# NMUN•NY 2019

# 14-18 April 2019

Documentation of the Work of the General Assembly First Committee

Conference B

# **General Assembly First Assembly**

### **Committee Staff**

Director	Asra Shakoor
Assistant Director	Yasmine Sabek
Chair	Mark Ruskikh
Rapporteur	Abdelrahman El Ghonamy
Rapporteur	Edgar Orozco

## Agenda

- I. Developments in the Field of Information and Telecommunications in the Context of International Security
- II. Nuclear Disarmament and International Security
- III. International Cooperation in the Peaceful Uses of Outer Space

### **Resolutions adopted by the Committee**

Code	Торіс	Vote
GA1/1/1	Nuclear Disarmament and International Security	101 votes in favor, 22 votes against,10 abstentions
GA1/1/2	Nuclear Disarmament and International Security	95 votes in favor, 28 votes against, 10 abstentions
GA1/1/3	Nuclear Disarmament and International Security	84 votes in favor, 34 votes against, 15 abstentions
GA1/1/4	Nuclear Disarmament and International Security	81 votes in favor, 30 votes against, 22 abstentions
GA1/1/5	Nuclear Disarmament and International Security	91 votes in favor, 19 votes against, 23 abstentions
GA1/1/6	Nuclear Disarmament and International Security	97 votes in favor, 08 votes against, 28 abstentions
GA1/1/7	Nuclear Disarmament and International Security	73 votes in favor, 48 votes against, 12 abstentions
GA1/1/8	Nuclear Disarmament and International Security	86 votes in favor, 30 votes against, 17 abstentions
GA1/1/9	Nuclear Disarmament and International Security	79 votes in favor, 41 votes against, 13 abstentions
GA1/1/10	Nuclear Disarmament and International Security	92 votes in favor, 7 votes against, 34 abstentions
GA1/1/11	Nuclear Disarmament and International Security	78 votes in favor, 37 votes against,18 abstentions
GA1/1/12	Nuclear Disarmament and International Security	95 votes in favor, 9 votes against, 29 abstentions

# **Summary Report**

The General Assembly First Committee held its annual session to consider the following agenda items:

- I. Developments in the Field of Information and Telecommunications in the Context of International Security
- II. Nuclear Disarmament and International Security
- III. International Cooperation in the Peaceful Uses of Outer Space

The session was attended by representatives of 133 Member States and two Observers. On Sunday, the committee adopted the agenda of II, I, III, beginning discussion on the topic of "Nuclear Disarmament and International Security." By Monday, the Dais received a total of 17 proposals covering a wide range of subtopics, including monitoring systems and cybersecurity, economic sanctions, and research and reduction of stockpiles. Additional analysis of the topic sparked debate as to how Member States could utilize existing nuclear power in the sustainable energy sector and create Nuclear-Weapon-Free Zones. The atmosphere in the committee was one of great compassion and collaboration. By the end of the session on Tuesday morning, multiple working papers merged along complementary and similar themes.

On Wednesday, 12 draft resolutions had been approved by the Dais, one of which had a friendly amendment. The committee adopted all twelve draft resolutions, all by simple majority vote. These resolutions represented a wide range of issues, including how Member States could prioritize funding, an update on the international understanding of Nuclear Energy, and transparency on nuclear research and testing. Delegates were determined to make progress and their efforts helped to suggest long lasting impacts on tackling the challenge of nuclear disarmament and international security.

#### Code: GA1/1/1 Committee: The General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Emphasizing the importance of article 1 of the Charter of the United Nations (1945) to "maintain 4 international peace and security", 5 6 Recognizing the importance of the chart, articles 3 and 5 of the Universal Declaration of Human Rights 7 (1948), Treaty of the Non-Proliferation of Nuclear Weapons (NPT) (1968), and the Comprehensive 8 Nuclear-Test-Ban Treaty (CTBT) (1996), 9 10 Affirming the Sustainable Development Goals (SDGs), particularly SDG 7,13 and 16, which refer to 11 affordable and clean energy, climate action and partnerships for the goals, 12 13 Emphasizing the SDGs 4, 9, 12, and 17 and the potential of nuclear technology as a means to ensure 14 global prosperity in terms of education promotion through the assistance of young professionals of 15 Member States, in order to better understand the energy needs of their own countries as well as within 16 the global context, 17 18 Recognizing the importance of the International Atomic Energy Agency (IAEA) and the Organization on 19 the Prohibition of Chemical Weapons to enhance Member States efforts and cooperation on nuclear 20 disarmament, 21 22 Noting with deep concern the effect of nuclear weapons has on the civilians and their lives historically as 23 well as concurrently, 24 25 Noting with appreciation the efforts made by the Disarmament and International Security Committee to 26 work on special sessions on nuclear disarmament to pursue regional measures to support disarmament 27 and form bilateral and multilateral cooperative arrangements to this end, inviting the participation of all 28 Member States, 29 30 Recognizing the efforts made by the IAEA in monitoring Member States and producing findings in their 31 IAEA Annual Report, 32 33 Deeply convinced that the nuclear weapons issues must follow a comprehensive universal approach 34 conducted on a national and international level thanks to transparency and cooperation, 35 36 Recognizing the need for a mechanism to monitor the gradual decrease of all nuclear material capable of 37 being weaponized globally, 38 39 Stressing that nuclear tests have a worrying consequence for human health and the environment in 40 accordance with the United Nations Scientific Committee on the Effects of Atomic Radiation's 1993 41 report, 42 43 Bearing in mind the importance of improving and increasing transparency between Member States' 44 ownership of nuclear and fissile materials as a step towards nuclear disarmament, 45 46 Emphasizing the importance of creating a nuclear-weapon-free zone to preserve civil populations and 47 nature wildlife from the harmful consequences of nuclear weapons, 48

49 *Mindful* of Member States' sovereignty to maintain the peaceful use of nuclear energy for energy 50 production and energy usage, 51 52 Recognizing the collaborative efforts done by the IAEA and Member States like Malta, Canada, Algeria, 53 Ghana on volunteering with the IAEA to train and develop the capacities of Member States to work on 54 long-term gradual nuclear disarmament; 55 56 Bearing in mind that nuclear disarmament has been a challenging issue for the past 10 years and that 57 long-term gradual reduction of nuclear materials is critical to all Member States, 58 59 Emphasizing the efforts taken by the United Nations Office on Disarmament Affairs (UNODA) in providing training and aiding with capacity buildings to facilitate Member States' efforts to implement international 60 61 and regional disarmament mechanisms, 62 63 Echoing the IAEA statute, which seeks to accelerate and enlarge the contribution of atomic energy for 64 peace, health, education and prosperity throughout the world, as well as to foster the exchange of 65 scientific and technical information on peaceful uses of atomic energy between all the Member States, 66 67 Drawing the attention of Member States to continue working on technology transfer and partnership 68 facilitation to promote the practices of: management, monitoring and evaluation of medical care, 69 70 Acknowledging the Peaceful Uses Initiative to create and facilitate advancements in the medical field; 71 72 Emphasizing the importance of having an "X-road" as the decentralized crossroad platform for accessing 73 research information, 74 75 Suggests the creation of an information-sharing database on nuclear technology that will be utilized 1. 76 for academic research and as a basis for the best practices to improve and provide education to local 77 and national governments and private businesses in collaboration with the United Nations 78 Educational Scientific and Cultural Organization by: 79 80 a. Enhancing transparency of new advancements in technology in order to facilitate research 81 and further developments in the fields of science and technology such as but not limited to: 82 83 i. Medical facilities: 84 ii. Collaboration with universities: 85 iii. Youth Propel Sustainable development academic competition; 86 iv. Regional and global conferences; 87 88 b. Utilizing information from current databases like the Nuclear Medicine Database and create 89 an "X-road" as the decentralized crossroad platform for accessing research information to: 90 Aid in research projects towards nuclear disarmament; 91 i. 92 ii. Aid in future medical and technological advancements; Have a centralized and unified database for all Member States to universally share; 93 iii. 94 95 2. Encourages the IAEA to expand the training and development programs for promoting technical 96 cooperation among regional areas for nuclear energy engineers from Member States pursuing long-97 term atomic energy projects with their respective state or region through: 98 99 a. The creation of regional facilities that provide informational resources for the implementation 100 of nuclear technology for medical uses in surrounding states to provide a continual support 101 system for the IAEA state-client should a massive health crisis arise in the region; 102

103 104 105		b.	Sponsoring and hosting developmental projects in internationally-recognized nuclear technology and research-specializing Member States that voluntarily offer training in conjunction with the IAEA-trained officers;
106			
107 108		C.	Providing educational resources to higher-education centers through the IAEA's Postgraduate Course Material in the Protection and Safety of Radiation Sources;
109 110 111	3.		<i>sizes</i> the importance of the Peaceful Uses Initiative in order to create collaborative solutions to I-related advancements under the SDGs;
112 113 114 115		a.	Increasing research and accessibility to the Sterile Insect Technique for Member States with unique need;
116 117 118		b.	Urging Member States to promote research to further advance technologies to mitigate diseases such as zika and malaria;
119 120 121		C.	Promoting groups such as the Royal College of Pathologists to further advance pathology research;
122 123 124	4.	•	Member States to maintain and improve nuclear safety and the imperative infrastructure pring Nuclear technologies abiding by the relevant IAEA standards when applicable;
125 126 127		a.	Noting the IAEA's Functions and Processes of the Regulatory Body for Nuclear Energy Safety;
128 129 130		b.	Paying special attention to the IAEA's Regulatory Control of Radioactive Discharges to the Environment;
131 132		C.	Directly following the IAEA's Code of Conduct on the Safety of Research Reactors;
133 134 135		d.	Strongly directed towards the Radiation Protection and Safety in Medical Uses of Ionizing Radiation;
136 137	5.	Reaffiri	ns the crucial role importance of the principles of the NPT, and therefore:
138 139 140		a.	Strongly encourages nonparties Member States to reconsider signing and ratifying the treaty, and in consequence for nuclear-weapon states:
141 142			<ul> <li>To pursue nuclear disarmament and to share with non-nuclear-weapon states the benefits of peaceful nuclear technology;</li> </ul>
143 144		i ii	<ul> <li>To cease acquisition of nuclear weapons;</li> <li>To identify economical alternatives to assist nuclear-weapon states (NWS) and</li> </ul>
145 146			denuclearization efforts;
147 148 149		b.	Suggests NWS and non-nuclear-weapon Member States parties to NPT, collaborate with the IAEA and collaborate with signatories of the <i>NPT</i> ;
150 151 152		C.	Expresses support for the 2020 Review Conference of the NPT regarding nuclear disarmament:
153 154 155			<ul> <li>For current and future collaboration between nuclear and non-nuclear states;</li> <li>For the creation of future treaties regarding nuclear disarmament;</li> </ul>
156 157 158	6.	Disarm	sts the creation of an ad-hoc committee under the IAEA, namely the Committee for Gradual ament (CGD), mandated with maintaining oversight on the gradual decrease of nuclear I strong enough to be weaponized:

450			
159		-	
160		a.	CGD will be preparing reports as per the IAEA's annual inspections which will focus on
161			reporting the percentage decrease of nuclear material in every Member State inspected by
162			the IAEA;
163			
164		b.	CGD shall comprise of 25 rotating Member States composed of nuclear and non-nuclear
165			states, who will act as the Executive Board of CGD:
166			
167			i. A minimum of 18 non-nuclear Member States should sit on the committee at any
168			given time; of the 18 rotating members at least three seats should be reserved for
169			African Member States, Asian Member States, European Member States, and one
170			seat for North American Member States, Central American Member States, and
171			South American Member States;
172			ii. Each Member State will have a chance to serve on the committee once before the
173			rotation cycle repeats which will occur every two years;
174			
175		С.	The Executive Board will hold biannual meetings to review Key Performance Indicators
176			regarding the findings and take corrective action if needed;
177			
178		d.	CGD will act as a facilitator when required to Member States by providing them with
179			mechanisms for the reduction of nuclear material;
180			
181		е.	
182			report to the international community;
183			
184		f.	CGD's headquarters will be in Western Europe;
185			
186		g.	Funding of CGD will be referred to Fifth Committee of the General Assembly (GA);
187			
188	7.		<i>r invites</i> Member States to sign and ratify the CTBT allowing it to enter in force and to prohibit
189		any civ	ilian or military nuclear test and explosion;
190			
191	8.		rages Member States to be part of the Intermediate-Range Nuclear Forces Treaty which urges
192			er States to eliminate and permanently forswear all of their nuclear and conventional ground-
193			ed ballistic and cruise missiles with ranges of 500 to 5,500 kilometers in order to maintain
194		peace	and security over a 40-year period;
195			
196	9.		r encourages Member States to increase their participation to the budget of the IAEA by 5
197			t through the regular budget fund, the technical cooperation found, the extra-budgetary fund in
198		order to	o allow the IAEA to reach its objectives of nuclear disarmament in a 10-year period;
199			
200	10.		Is to NWS to reduce their nuclear stockpiles, cease production of nuclear weapons and reduce
201		their nu	uclear weapons stockpiles through the available means:
202			
203		а.	Reduce their nuclear stockpiles by 34 percent over a 40-year period;
204			
205		b.	Receive exclusive rights to provide or build nuclear power plants and nuclear research
206			facilities in non-nuclear-weapon states, and optionally provide or build scientific research
207			facilities with regard to nuclear energy if NWS destroy at least 5% of their nuclear stockpiles
208			within 4 years;
209			
210	11.		Member States to report the number of nuclear weapons they own in order to be able to track
211			se, production and testing and set a unified system where they use these materials for
212		sustain	able purposes;
213			

214 215 216	12.	•	he Secretary General to put the negotiations of the <i>Fissile Material Cut-Off Treaty</i> on its a second states to:
210 217 218		a.	Discuss on the establishment of verifications measures within the treaty;
219 220		b.	Discuss if the agenda of the treaty should focus only on the production of the future fissile material or consider the existing material;
221 222 223		C.	Discuss the inclusion of confidence building measures to ensure cooperation and trust among non-Nuclear Member States and Nuclear Member States;
224 225	13.	Draws	the attention on the importance of a sustainable approach and focus for the denuclearization in
226 227			it of the SDG 7 about affordable and clean energy, and SDG 16 about peace, justice and institutions, by:
228 229 230		a.	Encouraging the countries to treat and recycle former sites of production of nuclear weapons, with the financial support of the United Nations;
231 232 233		b.	Tackling the present, by fostering the work of disarmament led by the IAEA with the cooperation of NWS;
234 235 236 237		C.	Promoting the production of clean sources of energy as an alternative to modern energy, such as promoting sustainable model less dependent of fossil fuels;
237 238 239 240	14.		<i>encourages</i> Member States to be collaborative with providing accurate information to the IAEA ng the liquidation and disarming nuclear warheads;
240 241 242	15.		ets that the UNODA create a global initiative focused on enhancing Member States' capabilities ing the internationally imposed standards for disarmament outlined in the NPT.

### Code: GA1/1/2 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 2	The General Assembly First Committee,
2 3 4	Emphasizing the threat nuclear weapons have towards international security and world peace,
5 6 7	Expressing its appreciation for programs that educate current and future generations within the field of safe nuclear energy,
8 9 10	<i>Desiring</i> communication with the International Monitoring System (IMS) to monitor compliance of Nuclear Weapons States (NWS) with <i>the Comprehensive Nuclear-Test-Ban Treaty</i> (CTBT) developed in 1996,
10 11 12 13	<i>Viewing with appreciation</i> the work done by the Nuclear Energy Institute (NEI) and the Nuclear Energy Agency (NEA) in contributing to the production of sustainable nuclear energy on a global scale,
14 15 16	<i>Recognizing</i> the importance of nuclear energy in concordance with Sustainable Development Goal (SDG) 7, which focuses on affordable and clean energy,
17 18 19	<i>Encouraging</i> Member States to make progress on SDGs 16 and 17 to reach peace, justice, and institutional development as well as creating partnerships in the field of nuclear energy,
20 21 22	<i>Expecting</i> full cooperation and communication among all Member States with regards to the disarmament of nuclear weapons,
22 23 24	Noting with deep concern the trade of nuclear production materials and nuclear weapon materials,
24 25 26	Having devoted attention towards decreasing nuclear stockpiles in efforts towards nuclear disarmament,
27 28 29	<i>Cognizant</i> of the fact that the catastrophic consequences of nuclear weapons transcend national borders and threaten non-nuclear weapons states (NNWS),
30 31 32	<i>Conscious</i> of the risk of nuclear weapon or nuclear grade material falling into the hands of non-state actors as a threat to all Member States,
33 34 35	Acknowledging Article 1 of the Charter of the United Nations (1945) which calls for international peace and security,
36 37 38 39	<i>Recognizing</i> the <i>Treaty of Tlatelolco</i> (1967) and the importance it plays towards nuclear disarmament by allowing treaty signatories to prohibit the placement of nuclear weapons on their sovereign soil by other Member States,
40 41 42 43 44 45	Mindful that all actions taken should not affect the inalienable right of Member States to research, produce, and use nuclear energy for peaceful purposes and in accordance with regional cooperative bodies under the International Atomic Energy Agency (IAEA) such as the African Regional Cooperation Agreement for Research, Development and Training Related to Nuclear Science and Technology (AFRA),
46 47 48	Noting with approval the contribution of United Nations Office of Disarmament Affairs (UNODA) in creating Nuclear Weapons Free Zones throughout the world,

49 50 51		Guided by the principles outlined in the CTBT, Treaty on the Non-Proliferation of Nuclear Weapons (NPT) 1968), and Fissile Material Cut-Off Treaty (FMCT) (1998),			
52 53 54 55	<i>Emphasizing</i> the importance of using Information Communication Technology (ICT) and uniting with the EU Non-Proliferation and Disarmament Consortium as well as the IAEA to do so with the expertise of members of the ICT Gozo Malta Project,				
56 57 58	for	Nuclear	<i>consideration</i> work done by the Nuclear Threat Initiative (NTI) in the International Partnership Disarmament Verification (IPNDV) that helps foster technological developments to better ar weapons and weapons grade material,		
59 60 61 62		•	g the importance of the IAEA, an international organization that promotes the peaceful use of ergy and prevents the use of nuclear weapons for military uses,		
63 64 65			Security Council resolution 2231 (2015) on "The Iran Nuclear Issue" that required Iran to ual reports to the IAEA concerning the status of nuclear disarmament,		
66 67 68 69	Nu	clear We	General Assembly resolution 70/40 on "United Action Towards the Total Elimination of eapons" which specifically calls on nuclear armed states to dispose of their nuclear weapons is the disarmament commitments in article VI of the <i>NPT</i> ,		
70 71 72	1.	Expects the treat	s all non-treaty members to respect the sovereignty of those Member States who have signed ty;		
73 74	2.	Reques	sts that nuclear Members States pledge to reduce nuclear stockpile by 10 percent by 2030 by:		
75 76		a.	Limiting nuclear weapons, nuclear devices, and nuclear missiles;		
77 78 79		b.	Reevaluating the global stockpile in 2030 to measure the percentage for all nuclear weapons states;		
80 81 82		C.	Converting nuclear weapons by liquifying the nuclear warheads and using this material to create nuclear energy;		
83 84	3.	Consid	ers limiting trade of materials that produce nuclear weapons by:		
85 86 87		a.	Encouraging NWS to limit the trade of nuclear grade material between Member States, private parties, and local governments on the sovereign soil of respective Member States;		
88 89 90		b.	Restricting the trade of volatile nuclear substances specifically Plutonium-239 and Uranium-235 in accordance with FMCT;		
91 92 93	4.		<i>bon</i> the Secretary General to set up a United Nations (UN) working group, comprised of resources, with the aid and backing of the Stockholm International Peace Research Institute:		
94 95 96 97		a.	The mission of this working group is to share information on the creation of nuclear energy and create partnerships working on the peaceful use of nuclear material through educational programs;		
98 99 100		b.	The working group will be divided by region to allow Member States to effectively utilize diplomatic connections and resources;		
101 102 103	5.		es accordingly the prohibition of the purchase of centrifuges used to refine nuclear material by n-recognized nuclear Member State;		

104 105 106 107	6.	develop strictly	mends the expansion of the mandate of the IAEA, in collaboration with regional research, oment, and training bodies related to nuclear energy such as the AFRA, allowing the IAEA to regulate, at the regional and international level, the purchase of new centrifuges for any ly recognized nuclear Member State;
108 109 110	7.		<i>attention</i> to verification measures taken by the IAEA as well as other non-governmental rations (NGOs) that should be further implemented by:
111 112 113 114		a.	Encouraging Members States that have nuclear power to put into place national policies that enable the IAEA and other organizations to have access to their nuclear arsenals;
115 116 117		b.	Strengthening the functions of the IPNDV by advising both NWS and NNWS to collaborate with this international body to produce innovative ideas on monitoring and verification;
118 119 120 121		C.	Advising Member States to submit annual reports to the IAEA to give an account on the decrease of nuclear arms in every NWS in accordance with reporting procedures developed in Security Council resolution 2231;
121 122 123 124	8.		s all Member States to ensure the security of stockpiles of nuclear weapons and nuclear grade I by increasing cybersecurity protections in coordination with the IAEA by:
125 126		a.	Working in close collaboration with the Informational and Telecommunication Union (ITU) to protect nuclear weapon launching devices;
127 128 129 130		b.	Suggesting the Group of Governmental Experts (GGEs) on the Information and Telecommunications Technology (ICTs) to pay more attention on the protection of security in cyberspace;
131 132 133		C.	Further suggesting that nuclear states use nuclear energy for sustainable development and to reach the targets of the SDGs by cooperating with the NEI and the NEA;
134 135 136	9.	<i>Further</i> NPT by	<i>recommends</i> the strengthening of supervision on the implementation of CTBT, FMCT, and <i>r</i> :
137 138 139 140 141 142		a.	Supporting the International Monitoring System (IMS) under the Comprehensive Test Ban Treaty Organization (CTBTO) by increasing budget to support technical development and improving domestic legislation in involved Member States, and to help progress and refine infrastructure building of monitoring stations;
142 143 144 145		b.	Further researching technologies measures that detect the purity of radioactive materials during the transportation and manufacturing process;
146 147		C.	Further encouraging NGOs (and organizations such as the IAEA) to monitor the progress and proposals of the development of nuclear weapons among all Member States;
148 149 150	10.	Strongl transpa	ly encourages Member States to cooperate with agencies such as the IAEA in regards to irency;
151 152	11.	Urges a	all nuclear Member States to halt the production of any new nuclear weapons.

#### Code: GA1/1/3 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Emphasizing Article 1 of the Charter of the United Nations which affirms the maintenance of international 4 peace and security, especially in reference to nuclear security, 5 6 Taking into consideration the Code of Conduct on the Safety and Security of Radioactive Sources, 7 8 Noting the National Implementation Plans of the 1540 Committee, 9 10 Further noting, with appreciation, the role international cooperation plays in developing legislation to 11 govern the proliferation, 12 13 Bearing in mind the International Court of Justice has stated there is an obligation to work in good faith 14 when negotiation in regard to nuclear weapons, 15 16 Further considering General Assembly Resolution 56/24 of 2002 on "General and Complete 17 Disarmament" on the importance for safe handling of radioactive materials to understand the destruction 18 that can be caused by nuclear weapon detonation, 19 20 Noting the 2030 Agenda for Sustainable Development and Radiation Safety Standards Committee's 21 (RASSC) all its ambitious goals of development, 22 23 Recalling Sustainable Development Goal (SDG) 7 on Affordable and Clean Energy, SDG 9 on Industry 24 Innovation and Infrastructure, SDG 16 on Peace Justice and Strong Institutions with platforms of open 25 communication, 26 27 Noting the final decision by the General Assembly on the 2014 Arms Trade Treaty (ATT) to ban the 28 production and trading of illicit arms, 29 30 Recalling the Convention of the Physical Protection of Nuclear Material (1979), 31 32 Expressing appreciation of the work done on International Convention for the Suppression of Acts of 33 Nuclear Terrorism (2005), 34 35 Strongly emphasizing the Fissile Missile Cut-Off Treaty (FMCT) which called for banning the production of 36 fissile material for nuclear weapons and other nuclear explosive devices, 37 38 Understanding the need for inclusivity and information transparency with least-developed countries 39 (LDCs) as supported by General Assembly resolution 69/39 on "Preventing Terrorists from Acquiring 40 Weapons of Mass Destruction," 41 42 Noting the importance of the World Biomass Report (2012), discussing renewable energy sources and 43 nuclear waste recycling, 44 45 Recognizing the need for compliance with the Nuclear-Weapon-Free Zones (NWFZ) to strengthen the 46 initiative of achieving total nuclear disarmament, 47 48 Further recognizing the successful measures of the United Nations Office of Disarmament Affairs 49 (UNODA) in regions such as Asia, Africa, and Latin America and the Caribbean,

50			
50 51	1.	Promot	es the expansion of the UNODA initiatives across all Member States to:
52			
53		а.	Support nations in conceptualizing, elaborating, and implementing voluntary National 1540
54			Committee Action plans;
55			
56		b.	Help facilitate the repurposing of nuclear materials for nuclear energy production;
57			Encourage the featuring of regional workshape regarding the sustainable wave of revelage
58 59		С.	Encourage the fostering of regional workshops regarding the sustainable uses of nuclear
59 60			energy as it will further capacity-building measures;
61	2.	Recom	mends that the International Atomic Energy Agency (IAEA) review the Comprehensive
62	2.		r Test Ban Treaty (CTBT) through specific mandates creating inspection provisions which:
63		. Tuolou	
64		a.	Apply for Member States who have ratified or acknowledged the treaty;
65			
66		b.	Understand that Member States can only be encouraged to sign the CTBT and that
67			inspections will occur no longer on the basis of ad hoc membership, but rather long- term
68			peace and cooperation;
69			
70		с.	Encourage statutes following the guidelines of topics discussed under the 2017 Conference
71			on Facilitating the Entry into Force of the CTBT, led by the UN General Assembly;
72	2	<b>F</b> utbou	recommended a new program under the num ious of LINODA to
73 74	з.	Further	recommends a new program under the purview of UNODA to:
75		a.	Assist regional entities in implementing a phased expansion program with the goal of
76		u.	expanding existing NWFZs and creating new NWFZs;
77			
78		b.	Develop a global north-south technical assistance program to help LDCs in:
79			
80			i. The creation of stronger security measures in the context of nuclear weapons and
81			nuclear material and defense against non-state actors;
82			ii. The establishment of mechanisms for information sharing in technology to be used
83			for the development of nuclear energy;
84 85	4	Freedur	ages Member States to refrain from purewing policies of vertical preliferation but
85 86	4.	Encour	ages Member States to refrain from pursuing policies of vertical proliferation by:
87		a.	Capping the number of nuclear warheads stockpiled and halting the production of new
88		а.	warheads;
89			
90		b.	Limiting development of new weapons systems and strategic delivery systems:
91			
92			i. Ceasing advancement of existing nuclear capabilities and nuclear weapon
93			technologies;
94			ii. Placing a 20-year moratorium on technological developments of strategic delivery
95			systems with periodic reviews conducted on a bi-annual basis by UNODA to ensure
96			transparency and compliance by Nuclear Weapon States (NWS);
97 98	5.	Dropos	es voluntary transparency measures overseen by the Secretary General to ensure NWS are
90 99	Э.		nt and comfortable with participating in disarmament dialogues and measures by:
100		connac	In and connortable with participating in disarmament dialogues and measures by:
100		a.	Requesting the General Assembly to develop a Nuclear Disarmament Advisory Group
102			equally represented by all NWS, structured and selected through the following procedures:
103			
104			i. Requesting NWS nominate an equal number of nuclear experts and military officials
105			as candidates for this transparency group;

106			ii. Calling upon the Secretary General to oversee approval of this group's membership,
107			ensuring inclusivity within the group;
108			
109		b.	Tasking the transparency group with yearly inspections of NWS' nuclear weapon stockpiles,
110			verifying continued cooperation in line with the outlined capability and stockpile reduction
111			measures and producing a report accessible by fellow NWS party to the advisory group;
112			
113		C.	Discouraging NWS from abstaining to collaborate towards collective reductions in nuclear
114		0.	capabilities and stockpiles;
115			
116	6.	Calle f	or the cooperation of organizations such as the United Nations Institute for Disarmament
117	0.		
		Resea	rch and UNODA to protect susceptible nuclear waste by;
118			
119		а.	Revisiting the RASSC to create a more efficient method of nuclear waste disposal, building
120			from existing standards:
121			
122			<ol> <li>Enhancing incineration procedures of Low-Level Waste (LLW);</li> </ol>
123			ii. Augmenting chemical decommissioning of Intermediate-Level Waste with a goal of
124			increased efficiency;
125			iii. Additionally, augmenting the processing of High-Level Waste into waste products and
126			recyclable fuel source;
127			·····,······,
128		b.	Establishing protocols for safe disassembly and handling of sensitive or radioactive materials
129		ν.	through:
130			unough.
131			i. Promoting capacity-building initiatives for LDCs to further develop nuclear material
132			disposal safety measures, achieved through the dissemination of relevant
133			technological capabilities;
134			ii. Reemphasizing the necessity of secure and safe transportation of nuclear materials
135			as stated in the code of conduct on the Safety and Security of Radioactive Sources
136			and the Regulations for the Safe Transport of Radioactive material;
137			
138		с.	Preventing non-state actors from accessing and/or compromising materials in the context of
139			nuclear development;
140			
141		d.	Adopting capacity-building measures to avoid unauthorized access and security breaches
142			which may result in the initiation of nuclear weapon systems;
143			
144	7.	Reaue	sts the creation of a bi-annual Summit for Advancing Nuclear Disarmament in Geneva
145			ng all Member States overseen by the UN to;
146			
147		a	Consider the in-depth research into second-hand fissile materials to ensure the fair and equal
148		а.	application of these measures among all Member States and promote enhanced knowledge
140			of nuclear energy production and proper waste disposal;
149			or nuclear energy production and proper waste disposal,
		h	Inclusion to existence the method of evidence energy revises by security of the evidence product
151		b.	
152			from missiles into renewable, clean nuclear energy by:
153			n 🖛 na sa mana ann ann ann ann ann ann ann ann a
154			i. Ensuring that there are efficient methods of nuclear energy provisions through
155			Biomass Nuclear Energy Conversion;
156			ii. Increasing incentives for NWS for nuclear disarmament through the reproduction of
157			fissile material and resources;
158			
159		C.	Promote the re-drafting of the FMCT to incorporate nuclear energy usage and mitigate the
160			process of gradual nuclear disarmament for affected Member States;
161			

162		d.	Support the IAEA's investigative efforts into nuclear disarmament;
163			Other data calleboarties between Marsher Otates as inclementing initiations such as OTDT
164 165		e.	Stimulate collaboration between Member States on implementing initiatives such as <i>CTBT</i> and <i>Global Initiative to Combat Nuclear Terrorism</i> (GICNT);
166			
167	8.	Reques	sts the prioritization of funds to the IAEA to be allocated towards research in:
168			
169		а.	Dismantling and repurposing nuclear weapons for peaceful use;
170			
171		b.	Outlining the economic benefits for the reutilization of fissile materials;
172			
173		C.	Advancing towards a nuclear weapons-free future supported by both NWS and non-NWS;
174	~	_	
175	9.	•	sts research and funding to the IAEA from willing Member States and organizations such as
176			rld Association of Nuclear Operators (WANO), Prospect Hill Foundation, and the UN Scientific
177		Commi	ttee of the Effects of Atomic Radiation to:
178		~	Address fassible and visble alternatives to immediate and total disarmament such as a
179 180		d.	Address feasible and viable alternatives to immediate and total disarmament such as a
181			freezing nuclear weapons development and eventual stockpile decreases;
182		b.	Outline the economic benefits, and provide plans, for the reutilization of fissile materials;
183		υ.	
184		C.	Seek additional solutions from both NWS and non-NWS to lead towards a nuclear weapons-
185		0.	free future;
186			
187	10.	Encour	ages Member States to accede to existing disarmament treaties such as the Treaty on the
188	-		oliferation of Nuclear Weapons (NPT) and the Partial Test Ban Treaty (PTBT);
189			
190	11.	Further	r encourages discussion from all Member States on the matter of nuclear disarmament.

Code: GA1/1/4 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

The General Assembly First Committee,

*Reaffirming* the principles of Article 1 of the *Charter of the United Nations (UN Charter)* (1945), which
 states a commitment to international peace and security, and involves addressing the importance of
 global nuclear disarmament,

Noting with satisfaction the success of the Joint Comprehensive Plan of Action as a model to effectively
 maintain transparency to hold Member States accountable for compliance with the Treaty on the Non Proliferation of Nuclear Weapons (NPT) (1970),

- *Concerned* by the ease of withdrawing from the NPT, thus weakening all efforts made towards
   disarmament guided by the NPT,
   13
- *Taking into consideration* Article IV of the NPT, which emphasizes the inalienable right of all Member
   States to utilize peaceful uses of nuclear energy, as well as encourages able Member States to assist in
   the facilitation of such technologies in a safe manner,
- *Emphasizing* the pressing nature of the NPT and the importance of holding violators accountable, as well
   as the humanitarian consequences of nuclear weapon testing, as stated within General Assembly
   resolution 73/70 on "Increasing transparency among Member States,
- *Emphasizing* the necessary prevention of manufacturing and stockpiling of nuclear weaponry, as stated
   within General Assembly resolution 73/86 (2018) adopting the Comprehensive Test Ban Treaty (CTBT) to
   increase transparency among Member States,
- *Taking into account* the distinguished framework done in the past by the European Nuclear Safety
   Regulators Working Group (ENSRWG);
- *Recognizes* the importance of the International Atomic Energy Agency's (IAEA) verification measures that
   help prevent a misuse of nuclear technology,
- Having examined the interconnected nature of disarmament and development in which disarmament can
   be viewed as a redirection of power towards areas such as technology and education,
   34
- Aware of the IAEA's work on the nuclear stockpile management within Member States to promote
   protection and peaceful uses of nuclear energy,
   37
- *Recognizing* the danger posed by non-state actors acquiring either nuclear material or functioning nuclear
   weapons,
- Acknowledging the uses of nuclear technology for water desalination, which can provide for the 1/5th of
   the population that does not have access to safe drinking water,
- 43
   44 *Commending* the efforts of the 1540 Committee which emphasizes keeping nuclear weapons and fissile
   45 material from falling into the hands of non-state actors,
- 46 47 *Aware* of the work continuously done by the General Assembly to hold all needs of the First Committee
- 48 and protect Article 1.1. of the Charter on peace and security,
- 49

1

17

51 (1979) and underlining their importance in ensuring both security and trust between States in nuclear 52 energy production, 53 54 Recalling the incentive that developing Member States have in destabilizing modernization bolstered by 55 nuclear energy, 56 57 Mindful of the 2015 Technology Bank for Least Developed Countries established by the General 58 Assembly and its ability to share technological information between Least Developed Countries (LDCs) 59 and Developed Countries, 60 61 Recognizing Sustainable Development Goal (SDG) 3, Ensure healthy lives and promote well-being for all 62 at all ages, and its aim to reduce deaths from non-communicable diseases, including cancer, 63 64 Bearing in mind the success of the creation of the Middle Eastern Synchrotron-lights for Excremental 65 Science and Applications in the Middle East Project whose particle accelerator is being shared by various 66 Member States, including Member States who have historically been at odds, and is supported under 67 United Nations Educational, Scientific and Cultural Organization, as a model of technological sharing, 68 69 Taking note of the efforts done by UN organizations, such as the World Health Organization (WHO) in 70 order to ensure educational, technical, and medical assistance to Member States working on 71 disarmament, 72 73 1. Calls for all able Member States to sign and ratify the NPT, and recognizes that certain States lack 74 the legislative and legal capacities to fully implement treaty provisions, and recognizes the need for 75 financial, technical, and logistical assistance; 76 77 2. Requests that the IAEA submit periodic reports to the General Assembly on the status of Member 78 States voluntary safeguard agreements with the IAEA, including the manufacturing, stockpiling, and 79 use of nuclear weaponry that would potentially violate the NPT framework, so as to increase 80 transparency and accountability among all Member States; 81 82 3. *Recommends* strengthening constraints on the withdrawal from the NPT: 83 84 a. Member States wishing to withdraw from the NPT must submit a notice that contains their 85 reason for withdrawal from the NPT to the IAEA; 86 87 b. Creating incentives for Member States considering withdrawal to build the capacity to 88 maintain compliance of the NPT and if further concern continues, to address said concerns at 89 the next annual IAEA conference; 90 91 4. Further recommends that Member States ratifying the Nuclear Non-Proliferation Treaty (NPT) and 92 partaking in IAEA's International Project on Innovative Nuclear Reactors and Fuel cycles (INPRO) 93 commit under its patronage a low-enriched uranium shared-use facility which would involve: 94 95 a. Brokerage by the INPRO between the facility's stakeholders concerning the produced 96 material: 97 98 b. Equal initial investment by Member States for the creation of the facility and proportional-99 sharing of maintenance costs according to Gross Domestic Product; 100 101 Involvement of International Organizations such as the European Union and their C. 102 development assets in the initial investment effort; 103 104 5. Welcomes the further inclusion of developing Member States to participate within the 2020 NPT 105 Review Conference, recognizing the important role that all States play in transparency and

Keeping in mind the principles of the Convention of Physical Protection of Nuclear Material (CPPNM)

106		confide	nce building measures;
107			
108	6.		ly encourages that NPT nuclear-weapon States take necessary steps to remove Special
109		Weapo	ns Emergency Separation Systems by 2030:
110			
111		а.	Dismantle all systems within nuclear-armed States by having the IAEA work under the
112			auspices of the UN to verify that such systems are removed within the agreed time period;
113		_	
114		b.	Approval from minimum of two certified government officials within a state must be granted
115			prior;
116	_	-	
117	7.		es that the Conference on Disarmament (CD) hold a new, voluntary bi-annual forum, modeled
118			e Organization for Security Cooperation in Europe's Forum for Security Co-Operation, in order
119		to:	
120			
121		a.	Facilitate dialogue among all pertinent stakeholders relating to nuclear forces, weapons, and
122			stockpiles;
123			
124		b.	Reduce ambiguity surrounding the acquisition and deployment of nuclear weapons;
125			
126		C.	Emphasize the need for coordination and transparency in regards to nuclear energy by all
127		0.	Member States by:
128			
129			i. Managing sub-groups to unite goals and coordinate developing nuclear power
130			programs on an international level;
131			ii. Encouraging the transparent and stable modernization of developing nuclear energy
132			plants;
133			iii. Seeking to establish guidelines and timelines on maximums for uranium enrichment
134			by new nuclear energy programs based on a yearly rate;
135			iv. Diluting and monitoring global uranium deposits strictly for the purpose of civilian
136			energy usage;
137			
138		Ь	Create a de-escalation task force to promote dialogue between all pertinent stakeholders,
139		u.	especially nuclear-armed Member States, in order to reduce uncertainty in the international
140			community:
141			community.
142			i. Consist of three members selected internally through the IAEA, whom will work with
142			the consent of each party;
143			ii. Requests collaboration between the Security Council and the IAEA to determine the
145			appropriate response to diffuse nuclear tension between States;
145			appropriate response to diffuse fuciear tension between States,
147		•	Distribute on an annual report to Member States that will update the international community
148		с.	on the developments in nuclear weapons and stockpiles;
149			on the developments in hubban weapons and stockpiles,
150		f.	Prevent conflict between the Nuclear-Weapons States (NWS) and Member States who are
151			developing nuclear technology;
152			developing hubbal technology,
	0	Decem	manda the collaboration between the IAEA and international organizations, mandated with
153 154	8.		mends the collaboration between the IAEA and international organizations, mandated with
155			ving international peace and security, such as the 1540 Committee, to set certain protocols for
155		uie tidi	nsfer of nuclear material through regions facing security instability:
157		2	Several protocols should be drafted for different areas given the specific circumstances for
158		a.	each region;
159			
160		b.	Protocols shall differ from one region to another based on the level of instability in the region;
		N.	

4.0.4			
161			The implementation of such protocols will be an evoluptory basis by baying Member States
162 163		C.	The implementation of such protocols will be on a voluntary basis by having Member States submit a statement of consent to the IAEA and the 1540 Committee;
164			Submit a statement of consent to the IAEA and the 1540 Committee,
165	9.	Calls f	or the creation of a working group, modeled after the ENSRWG, organized under the IAEA, for
166	5.		rpose of:
167		uio pui	
168		а	Proposing an annual international conference attended by willing and able Member States in
169		u.	order to:
170			i. Discuss clear dismantling methods for nuclear stockpiles;
171			ii. Become a mediator towards efficient storage policies at an international level;
172			iii. Encourage the international community to build an international network through the
173			combination of national measures of various Member States;
174			iv. Use dismantled nuclear stockpiles to create nuclear energy;
175			v. Sell produced nuclear energy to developing countries in order to promote
176			modernization;
177			
178		b.	Sharing methods about educational initiatives for Member States to educate various national
179			and international stakeholders on the importance of stockpile liquidation;
180			
181		C.	
182			stockpiles, as defined by IAEA yearly safety inspections, and assisting said States in any
183			ways pertinent to the specific Member State;
184	4.0		
185	10.		mes the continued efforts and collaboration between these regional forums to coordinate and
186			unicate all work with relevant UN organizations, including the IAEA and the United Nations
187			e for Disarmament Research (UNIDIR), as well as, the CD if or when multilateral negotiations
188		recomi	mence;
189	44	Degue	ate the IAEA to improve their Technical Cooperation Drearonme to even and their training
190 191	11.		sts the IAEA to improve their Technical Cooperation Programme to expand their training nism to address the training of stockpile security agencies regionally to use these stockpiles in
191			ful matters for nuclear energy in order to shrink stockpiles and promote peaceful uses;
192		peacei	al matters for nuclear energy in order to smillik stockpiles and promote peaceful uses,
194	12	Uraes	Member States to increase dialogue and financial contributions within the IAEA Global Nuclear
195	12		and Security Network to enable Member States to have stronger security mechanisms against
196			ssible proliferation of nuclear materials to Non-State Actors;
197			,
198	13.	. Recon	nmends further research by the IAEA into the desalination process of water at nuclear plants in
199			to combat the staggering amount of the populous who are negatively affected globally by:
200			
201		a.	Encouraging the IAEA to consider the cost efficiency of uranium to a concentrated brine;
202			
203		b.	Supporting hybrid desalination technologies from a Coordinate Research Project (CRP);
204			
205		C.	Implementing safety protocols protecting Member States, from the risk of future
206			contamination;
207			<b></b>
208	14.		the General Assembly to promote the creation of the International Day of Nuclear Energy in
209			o spread the knowledge about the advantages of nuclear energy among the citizens, by asking
210		States	to:
211		_	Current output initiatives which advants people on the functioning and herefile of such as
212		a.	Support cultural initiatives which educate people on the functioning and benefits of nuclear
213 214			energy;
214 215		b.	Promotes the incorporation of nuclear energy seminars in academies and schools;
215		υ.	romotes the incorporation of nuclear energy seminars in academics and schools,
210			

217 218 219	c.	Suggest to the mass media, civil society and private organizations to become sponsors of these events, in order to involve more people and organizations;
220 221 222		s the LDCs Technology Bank created by the Istanbul Programme of Action to encourage the full transfer and development of nuclear technology, and:
223 224 225	a.	Promote triangular cooperation, involving two or more developing Member States in collaboration with a third party;
226 227 228	b.	Foster inclusivity and information exchanges designed to improve LDC capacity with respect to nuclear energy production and waste storage, as well as applications to medicine, with;
229 230 231		<ul> <li>Improvements to nuclear energy production including Small Modular and Pressurized-Heavy Water Reactors;</li> <li>Improvements to the medical field including new radio therapies and isotope</li> </ul>
232 233 234	C.	Improvements to nuclear waste storage including power-to-gas concepts and storage pool
235 236		infrastructure;
237 238 239		<i>Is</i> to Member States to coordinate with UNIDIR to utilize existing regional bodies to create a ated forum by the next Fiscal Year 2020 to perform the following functions:
240 241 242	a.	Exchange detailed reports on all uses of enriched uranium and plutonium, including in the energy and medical sector;
243 244 245	b.	Facilitate dialogues regarding the best practices of peaceful uses of nuclear technology, particularly in power production;
246 247		Share knowledge of the negative effects of nuclear technology on the agricultural industry;
248 249 250 251 252	Action develo	attention to expanding the use of nuclear technology by investment in the <i>Programme of</i> <i>s for Cancer Therapy</i> by all willing and able Member States so that all States, regardless of pment status, have access to radiotherapy, nuclear medicine, and imaging services so that r energy can be obtainable for strictly peaceful and sustainable use;
253 254 255 256 257	weapo Inform	nmends that Member States establish system that promote transparency and control of nuclear ins in order encourage absolute nuclear disarmament, along with the original-Agency-Wide ation System for Program Supports goal of planning, financing, procurement, project gement, human resources and administration;
258 259 260 261	techno	ests the Education and Training programme of WHO to establish community nuclear logical educational medical facilities following the model of IAEA Verification Offices to plish these certain goals:
262 263 264	a.	To offer training services through the assistance of the Joint Research Centre following the IAEA Curricula for Nuclear Medicine Professionals;
265 266	b.	To provide additional training under the Inter-Agency Committee on Radiological and Nuclear Emergencies in handling these nuclear medicines.

### Code: GA1/1/5 Committee: The General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Remembering the infamous and unprecedented devastation by the dropping of an atomic bomb on 4 Hiroshima and Nagasaki on 6 and 9 August of 1945, respectively, 5 6 Emphasizing that nearly 15,0020 nuclear weapons exist while only 22 Member States have ratified the 7 2017 Treaty of the Prohibition of Nuclear Weapons (TPNW), 8 9 Affirming Article 1, of the Charter of the United Nations (1945) and General Assembly resolution 73/56 on 10 "Reducing Nuclear Danger", which recognizes a commitment to international peace and security in the 11 context of an increasingly digitized world, 12 13 Recognizing the need to integrate the needs and concerns of developed and developing states in the 14 implementation of nuclear disarmament and the urgency of finding solutions that are compliant with the 15 social, cultural, economic, and political spheres of these Member States, 16 17 Emphasizing the need for structural units to educate Member States on the development of nuclear 18 security training, radiation detection, and international cooperation, as outlined in General Assembly 19 resolutions 73/80 on "United Nations Regional Centers for Peace and Disarmament", General Assembly 20 resolution 73/59 on "United Nations Study on Disarmament and Nonproliferation Education", General 21 Assembly resolution 73/57 on "Universal Deceleration on the Achievement of a Nuclear Weapon-Free 22 World", and General Assembly resolution 73/40 on "Follow-Up to the 2013 High-Level Meeting of the 23 General Assembly on Nuclear Disarmament", which all confirm the need the need and desire for methods 24 on educating states on the harmful effects of nuclear weapons, 25 26 Encouraging Member States to exclusively use nuclear technology for peaceful purposes in an effort to 27 provide positive sustainability without imposing the danger nuclear weapons provide to all, 28 29 Noting with concern past abuse of sanctions, blockades, and embargoes which this body considers to be 30 aggressive, unconstructive, and injurious to progress and international collaboration on the issue of 31 disarmament, noting the consistent and annual consensus on the matter of unwarranted embargoes as 32 detailed in General Assembly resolution 73/8 on" Necessity of ending the economic, commercial and 33 financial embargo imposed by the United States of America against Cuba," 34 35 Recognizing General Assembly resolution 1/1 on the "Establishment of a Commission to Deal with the Problem Raised by the Discovery of Atomic Energy" that calls for the "control of atomic energy to the 36 37 extent necessary to ensure its use for peaceful purposes" and the eventual elimination of atomic 38 weapons, 39 40 Acknowledging the 2030 Agenda for Sustainable Development and it's goal to empower younger 41 generations regionally and nationally to "meet young people's needs, realize their rights, and tap their 42 possibilities as agents of change" as directed by the Sustainable Development Goal (SDG) 16 for strong 43 and inclusive societies and General Assembly resolution 32/50 on "Peaceful Use of Nuclear Energy for 44 Economic and Social Development" which discusses peaceful uses of nuclear energy for social and 45 economic development, 46 Keeping in mind the humanitarian repercussions if nuclear weapons were to be detonated, as mentioned 47 48 in General Assembly resolution 73/47 on "Humanitarian Consequences of Nuclear Weapons," 49

50 *Reaffirming* the threat of nuclear weapons as incompatible with the right to life, as stated in Article 6, 51 paragraph 1, of the *International Covenant on Civil and Political Rights* (1976),

52

*Calling on* Member States to abide by SDG 15 to ensure vibrant environments and ecosystems by
 recognizing the harmful effects on health and quality of life caused by exposure to radiation and nuclear
 tests,

56

57 Appreciating General Assembly resolution 14/1378 on "General and Complete Disarmament". General 58 Assembly resolution 70/40 (2015) on "United Action with Renewed Determination Towards a Total 59 Elimination of Nuclear Weapons", General Assembly resolution 65/65 (2010) on "Treaty Banning the 60 Production of Fissile Material For Nuclear Weapons or Other Nuclear Explosive Devices", General Assembly resolution 72/38 on "Nuclear Disarmament", and General Assembly resolution 72/31 on 61 "Taking Forward Multilateral Nuclear Disarmament Negotiations" which call on Member States to reach 62 63 the goal of eliminating nuclear weapons, prohibiting fissile material production, halting development of 64 nuclear weapons, and signing and ratify NPT, 65

- *Bearing in mind* that there are currently no programs or incentives for Nuclear Weapon States (NWS) to
   dispose of their nuclear arsenals willingly,
- Noting with satisfaction the 1996 Comprehensive Test Ban Treaty (CTBT) as multilateral agreement that
   bans all nuclear explosive testing,
- *Re-emphasizing* SDG Goal 17 for global partnerships and international collaboration as the best and
   clear method for developing nuclear energy,
- Acknowledging General Assembly resolution 69/65 on "United Nations Study on Disarmament and
   Nonproliferation Education" regarding nuclear disarmament and nonproliferation education,
- *Expressing* appreciation for the Technical Cooperation Program of the International Atomic Energy
   Agency (IAEA) and its role in advancing responsible development of peaceful applications of nuclear
   technology and contributing socio-economic development around the world,
- 81
  82 Stresses the desire for Member States to adopt clean and renewable energy methods as outlined in the
  83 Paris Agreement (2015) to fulfill the SDG 7 through green energy alternatives and for Member States to
  84 view the states of Iceland and Uruguay as guiding forces and models of success, as they are two
- 85 Member States who have moved from fossil duels to over 97 percent renewable energy sources, such as 86 hydroelectricity, geothermal energy, wind, and solar power,
- 87

- *Draws attention* to the Fissile Material Cutoff Treaty and understands that the production of Plutonium
   and High Enriched Uranium must be restricted in order to halt further nations from becoming NWS,
- 90
  91 Bearing in mind the growing risk in the sphere of information security of malicious efforts from criminals
  92 and hackers targeting national infrastructure and governments expressed in the Group of Governmental
  93 Experts Report 65/201 of 2010,
- 94
  95 *Noting* approval to Estonia's X-Road system that develops a universal information storing database
  96 where each party owns their own information and expanding it to an international model to promote
  97 multilateralism and safeguarding development,
- Requests the United Nations to rename the "Atomic Bomb Awareness Day" to "Hiroshima and Nagasaki Remembrance Day (Orizuru Day)" to draw direct attention to the sufferance of human lives and mass deconstruction as a result of atomic warfare which changed the landscape and international relations forever;
- Calls upon Member States to develop a framework to take action against any actor that may develop a nuclear weapons program in the future, such circumstances such as follows:

106		
107		a. When a non-nuclear state initially is found to be developing, or currently possessing, a
108		nuclear weapons program, stockpiling nuclear weapons materials, as well as withdrawing
109		from treaties that prevent the proliferation of nuclear weapons, such as the NPT, CTBT, or
110		any future treaties, and additionally, when the internalization community is threatened by a
111		Member State's nuclear weapons program;
112		
113		i. The UN will condemn the proliferation of nuclear weapons programs with a resolution
114		specific to that country;
115		ii. The General Assembly will recommend that the Security Council place sanctions on
116		the country each time a development is made with regards to a new and/or
117 118		unauthorized nuclear weapons program; iii. The General Assembly will recommend that the Security Council place sanctions on
119		the new nuclear states to encourage them to begin nuclear disarmament and that the
120		Security Council will also place sanctions on the existing state(s) that gave them the
121		information or technology to possess these weapons;
122		
123	3.	Discourages sanctions, embargoes, and blockades which:
124		
125		a. Are overly punitive and extend past the resolution of the issue which those committing the
126		sanctions sought to address;
127		b Constitute on any remetrical and unfair use of according and reprodition former
128 129		b. Constitute an asymmetrical and unfair use of economic and geopolitical force;
130		c. Seek to advance colonial interests and/or infringe on the right to self-determination as
131		outlined in Article 1, Clause II, of the UN Charter,
132		
133	4.	Further requests Member States to aid in the ratification of the NPT in order to modernize the
134		information and set appropriate goals for minimizing the number of nuclear weapons and weapons of
135		mass destruction in NWS:
136		
137 138		a. Encourage Member States to abide by the NPT by initiating economic sanctions against
130		countries that violate the limits set by the ratified treaty;
140		i. Suggests that the safeguards under the IAEA give quarterly reports to the United
141		Nations Office for Disarmament Affairs to recognize the status of weapons in NWS;
142		ii. Requires that if in six months the nuclear stockpile within a Member State fails to
143		initiate the disarmament procedures laid out in the NPT, economic sanctions will be
144		enacted;
145		
146		<ul> <li>Provide economic incentives for Member States that abide by the NPT by allowing them</li> </ul>
147 148		access to trade negotiations in the globalized world economy;
140		c. By updating the NPT to include new terms and conditions regarding nuclear weapons,
149		Member States will have an updated framework that would allow all states to reach the UN's
151		goal of global nuclear disarmament;
152		
153	5.	Suggests the establishment of a program by the United Nations Office for Disarmament Affairs
154		(UNODA) that provides debt relief incentives to nuclear weapons sates by placing a monetary value
155		on the existing nuclear weapons that, once turned over, disarmed, and repurpose for constructive
156		energy uses by the IAEA, could be exchanged for debt erasure;
157 158		a Such a program would extend to puelear operaturaliant Member States if they agree to a
158		<ul> <li>Such a program would extend to nuclear energy-reliant Member States if they agree to a treaty stating their respective governments will take the necessary steps to curb their nuclear</li> </ul>
160		energy production significantly by 2030;
161		

162 163 164 165			<ul> <li>Nuclear power-reliant Member States taking part in the UNODA Debt Relief Program to received educational aid from the Commission on Sustainable Development on how to replace nuclear energy with renewable, clean energy sources;</li> </ul>
166 167 168 169 170 171	6.	educati includir nuclear	sts the allocation of additional resources to the IAEA in order to generate programs for ing Member States on the dangers and repercussion and the use of nuclear weapons, ng potential health concerns revolving around human and environmental safety, the dangers of r smuggling and improper waste management, and the importance of having and properly nuclear security staff;
172 173 174	7.		ng an opt-in worker exchange program between willing Member States to educate and train s from countries who are willing to participate and would include:
174 175 176 177		a.	Grant foreign workers the opportunity to have hands-on experience in a successful nuclear facility under supervision;
178 179 180 181		b.	Sharing the growing information between Member States in how to properly handle adverse situations by creating a network with all procedures and safety protocol to be easily accessed;
182 183 184		C.	Recognizes that such a worker exchange program will enable further improvement of global partnership, thus progressing the efforts of SDG 17;
185 186 187	8.		rages Member States to upgrade nuclear security principles to eliminate security flaws in r plants such as:
188 189 190		a.	Providing on-site armed guard forces that are well-equipped, well-trained, professional, and with sufficient experience to combat unpredictable threats;
191 192 193		b.	Carrying out a two-person or three-person rule whenever relevant materials are moved in order to prevent threats from personnel;
194 195 196 197		C.	Ensuring that material is watched over at all times under ingenious alarm, advanced monitoring technology as well as rigorous guard system, which covers any place in nuclear plants;
198 199 200		d.	Create a definition for a "nuclear meltdown" and how it can be prevented from accidents from human error or weather error;
200 201 202 203	9.		mending further studies through the IAEA directed into the Metal Organic Framework (MOF) to be proper disposal of Nuclear Waste and increase Nuclear Energy use;
203 204 205 206 207 208		a.	Strongly recommends transparency and information sharing in measures towards using former Nuclear Weapons in the development of Nuclear Energy and suggesting implementation of policies similar to the IAEA Low Enriched Uranium (LEU) Bank's protocols regarding pertinent data;
209 210 211		b.	Encourages the use of the MOF to reuse Nuclear Waste towards establishing new infrastructures;
212 213 214		C.	Urges the conduction of further research and development of the MOF regarding its benefits with aim to expand its capabilities;
215 216 217		d.	Recommending annual inspections and safety reports executed and overseen by Operational Safety Review Team (OSART);

218 219 220 221	e.	Considers further studies through the IAEA with the methods previously stated to be in line with the global indicator framework for SDG 7 explained in General Assembly resolution 71/75 (2016) on "Convention on the Prohibition of the Use of Nuclear Weapons;"
222 223 224 225	repurp	the Member States to participate in the relocation of funds on research and development of osing nuclear weapons' components as a dual-use of chemicals for generating nuclear energy, poses such as:
226 227	a.	The agricultural protection of crops through pest elimination;
228 229	b.	Medical technologies such as radiology and chemotherapy;
230 231	C.	Space Exploration including fissile fuel energy and scientific observation;
232 233	d.	Water Desalination by the use of excess heat, evaporation and condensation;
234 235 236		nmends the expansion of a program similar to X-Road that will be developed in the UN to transparency and multilateralism;
237 238 239	a.	Through the expansion of X-Road to the international database, national nuclear safeguards and weapons information can be stored and accessed by Member States;
240 241 242	b.	Member States will retain sovereignty by having the ability to remove or change their stored information when deemed necessary;
243 244 245	C.	Creating a platform for future development to align with international standards and promote stable growth;
246 247 248		orts offering resources to regional efforts that focus on nuclear disarmament and the destruction s and ammunition within the region through funding by the IAEA;
249 250 251		esting that attention be drawn to the imminent threat of sensitive nuclear related information that accessed through little implementation of national cyber-security plans;
252 253 254	a.	By recommending the implementation of cyber-security policy to complement already existing national security protocol;
255 256 257	b.	Through the promotion of international cooperation and dialogue on maintaining peaceful use of cyberspace;
258 259 260	C.	By utilizing transparency of all effective cyber-security national protocols to ensure the safe development of future nuclear technology;
261 262 263 264	2030 a	ly recommends the United Nations facilitate conventions for youth, in reference to the Youth agenda, that include scholars, historians, and leading innovators in cultivating an environment nuclear proliferation;
265 266 267	a.	These conventions would include creative interpretations of the repercussions of nuclear warfare through film, literature, and art;
268 269 270	b.	An emphasis on exposing youth to primary accounts of those who experienced the nuclear events of Hiroshima and Nagasaki;
271 272 273	C.	Further promoting this be done on both a regional and international level to expedite cooperation and awareness on multiple levels;

- 15. Encourages all Member States to safely disarm all their nuclear weapons so that we may have a
   nuclear-free world, acknowledging that not all states will be willing to undergo nuclear disarmament
   and discourages Member States from being resistant to disarmament;
- 278 16. Urges all Member States to stop nuclear testing near civilian populations by accepting and ratifying
   279 the CTBT;
- 280
   281 17. Condemns states that have recently developed a nuclear weapons program and any states that may begin a new nuclear weapons program and works to prevent such occurrences through putting
   283 stronger sanctions in place against nuclear testing within the CTBT.

Code: GA1/1/6 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Guided by the Charter of the United Nations (1945), particularly Article 1, which calls upon Member 4 States to maintain international peace and security, 5 6 Noting with deep concern the negative humanitarian impacts nuclear weapons pose on all Member 7 States and future generations, 8 9 Convinced that the establishment of Nuclear Weapons Free Zones (NWFZs) does not interfere with the 10 sovereignty of Member States' development of the peaceful use of nuclear energy, 11 Bearing in mind the Treaty on the Non-Proliferation of Nuclear Weapons (1970) (NPT), which has the 12 13 purpose of stopping the spread of nuclear weapons and adopting universal non-proliferation mechanisms, 14 as well as General Assembly resolution 70/40 (2015) on "United Actions With Renewed Determination 15 Towards the Total Elimination of Nuclear Weapons", 16 17 Reaffirming the Treaty of Tlatelolco (1967), Treaty of Rarotonga (1985), Treaty of Bangkok (1997), Treaty 18 of Semipalatinsk (2006), and the African Nuclear Weapon Free Zone Treaty (2009) which established 19 NWFZs in Latin America and the Caribbean, the South Pacific, Southeast Asia, Central Asia, and Africa, 20 respectively, 21 22 Drawing attention to the important need for all States to recognize currently existing NWFZs, particularly 23 those which concerns areas not included in the sovereign territory of any Member States, to include the 24 Antarctic Treaty System (1959), Outer Space Treaty (1967), and the Seabed Arms Control Treaty (1972), 25 26 Appreciating highly the work of Member States towards establishing a nuclear weapons free world 27 through the negotiation of regional treaties that work to promote Sustainable Development Goals (SDGs) 28 3, 11, 16, and 17, 29 30 Expressing the need for good health and well-being, decent work and economic growth, sustainable cities 31 and infrastructure, integrating climate change measures into national policies, strategies and planning, 32 and peace, justice, and strong institutions, 33 34 Remembering the 2015 Review Conference of the Parties to the Treaty on the NPT and its agreement to 35 hold a conference on establishing a NWFZ in the Middle East and bearing in mind the regional and global 36 stability that would stem from it. 37 38 Highlighting the role of the International Atomic Energy Agency (IAEA) in improving cooperation in all 39 areas of nuclear technology, 40 41 Recognizing the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use 42 Goods and Technologies (1996), which encourages Member States to share safe weapons, transfer 43 information and multiple use of conventional weaponry technology, 44 45 Strongly commending the progress made to reduce the number of nuclear weapons through Member 46 States' adherence to existing NWFZs, 47 48 Recognizing that highly enriched fissile material from decommissioned nuclear weapons continue to 49 present a risk of nuclear proliferation and represents a substantial threat to international security, 50

106 107 108		a.	Use peaceful nuclear energy resources and technologies to further the growth of developing nations;
100 109 110		b.	Promote the economic growth of Member States by reducing the threat of nuclear conflict;
110 111 112 113		с.	Ensuring Member States acting in direct violation of the NPT are held accountable through strong institutions;
114 115 116		d.	Endorses urgent action concerning the impact of nuclear weapons which exacerbate climate change concerns;
117 118	5.	Recom	mends certain elements of existing regional NWFZ such as:
119 120		a.	Including exclusive economic zones to combat the transportation of nuclear weapons;
120 121 122		b.	Enhancing peace and security to all states who currently participate in NWFZs;
123 124		C.	Preventing the development of new nuclear weapons and further prohibited non-NWS from obtaining nuclear weapons;
125 126 127	6.	Remino	ds Member States of the significant role of the IAEA, which holds the responsibility of:
127 128 129 130		a.	Sharing expertise with Member States allowing them to have the technological capability to safely dispose of nuclear weapons and/or waste;
130 131 132		b.	Fostering the efficient and secure use of nuclear power by reporting to the IAEA;
133 134		C.	Ensuring that new Member States are not obtaining nuclear arsenals;
135 136		d.	Holding annual regional negotiation conferences to discuss proper application of each NWFZ;
137 138	7.	Encour	ages Member States with nuclear expertise to provide support for the IAEA by:
139 140 141		a.	Hosting and providing training activities for IAEA, including comprehensive inspection exercise training and additional protocol complementary access exercise;
142 143		b.	Providing safe environments for testing newly developed technologies, especially containment and surveillance equipment for nuclear weapons and/or waste;
144 145		C.	Developing methods and equipment for nuclear material being verified and identified;
146 147 148	8.		mends the creation of an international agreement modeled upon the Wassenaar Arrangement with a focus on nuclear materials and weapons, which will:
140 149 150 151		a.	Promote transparency, exchange of views, and information and greater responsibility in transfers of nuclear materials;
152 153 154		b.	Ensure participating Member States will use their intelligence agencies and services to prevent nuclear materials and technologies from being used in areas that comprise regional and international security and stability;
155 156 157 158 159		C.	Ensure participating Member States will keep strict export control on nuclear materials and share view and information on how to best mitigate to mitigate the risks involved in transferring nuclear materials;

160 161 162		d.	Open on a global and non-discriminatory bases, and all Member States with nuclear capabilities, peaceful or non-peaceful, are requested to join;
163 164 165	9.	<i>Endors</i> through	es the use of multilateral approaches that aim to improve global nuclear disarmament policy n:
166 167 168		a.	Capacity building amongst Member States both with and without nuclear weapons to develop methods for monitoring and handling nuclear weapons and materials for peaceful purposes;
169 170 171 172		b.	Adopting a draft that stresses the transparency of Member States, especially those possessing nuclear weapons, in respect to the provided incentives in making sure disarmament is accomplished;
173 174 175	10.	<i>Calls</i> fo will:	or the convening of the General Assembly on a Fourth Special Session on Disarmament which
176 177		a.	Provide an updated discussion on the new developments and issues of emerging technology;
178 179 180 181		b.	Create sub-committees in which Member States can report to concerning violations regarding NWFZs which would then be subsequently reported to the IAEA on an annual basis to increase transparency;
182	11.		hat confidence-building measures in existing NWFZs could be enhanced with the
183 184		establis	shment of verification protocols on the process of nuclear disarmament within NWS by:
185 186 187		a.	Encouraging all Member States within each NWFZ to voluntarily send experts on nuclear issues to form verification groups in every NWFZ;
188 189 190		b.	Suggesting that the NWS set relating national policies to qualified verifications groups sent by NWFZs;
191 192 193	12.		<i>mends</i> working towards eliminating the possession of nuclear weapons through the monitored on of existing stockpiles by:
194 195 196		a.	Asking that the IAEA and UNGGE have regulatory annual checks for the implementation of the previously listed clauses based on voluntarily provided information from NWS;
197 198		b.	Requesting the implementation of an International Production Database;
199 200 201	13.		sts the Member States, specifically those in the Middle East region, as defined by the IAEA, e on nuclear disarmament followed by the development of nuclear technologies:
202 203	14.	Insists	total nuclear disarmament be the primary objective in the creation of a NWFZ;
203 204 205 206	15.		confidence building measures among regional Member States in the development of nuclear ogies in the field of energy for sustainability;
207 208		a.	Supply low-enriched uranium (LEU) from the IAEA LEU Bank in Oskemen, Kazakhstan;
209 210 211	16.	•	he creation of a Northern Nuclear Weapon Free Zone (NWFZ), including the Arctic Circle and a, with a step by step approach towards denuclearization by:
212 213 214		a.	Prohibiting the manufacture of nuclear weapons and specific delivery systems such as missile launch platforms and facilities;

215 216 217	b.	Forbidding all forms of nuclear weapons testing in accordance with existing treaties such as the CTBT;
218 219 220	C.	Permitting the storage of nuclear waste in countries surrounding the Arctic Circle, and acknowledging the need for further research into safe disposal methods;
221 222 223 224	d.	Including within its scope the entirety of Canadian territories, both mainland and offshore, the entirety of the Arctic permafrost regions, and the entirety of Arctic waters as outlined by the International Hydrographic Organization (IHO);
225 226 227 228	e.	Recognizing the efforts and inclusion of Canada, Denmark, Iceland, Norway, the Russian Federation, Sweden, and the United States of America in the formation and negotiation of this treaty;
229 230	17. Also ur	ges the creation of the Bangladesh, Bhutan, Nepal (BBN) NWFZ by:
231 232	a.	Prohibiting the manufacture of nuclear weapons and related delivery systems;
233 234 235	b.	Forbidding all forms of nuclear weapons testing in accordance with existing treaties such as the CTBT;
236 237 238	C.	Seeking confidence building measures among regional member states in the development of nuclear technologies in the fields of energy sustainability;
239 240 241	d.	Requesting a summit between regional Member States to discuss steps to be taken toward denuclearization with the region;
242 243 244	e.	Recognizing the efforts and inclusion of Bangladesh, Bhutan, and Nepal in the formation and negotiation of this treaty;
245 246 247		sts Member States establish a comprehensive framework designed to prevent non-state actors equiring and using any form on nuclear-based weapons by:
248 249	a.	Ensuring the secure disposal of weaponizable fissile material;
250 251	b.	Engaging with the existing institutional structures within the IAEA;
252 253 254	C.	Creating a radioactive waste management strategy to ensure a safe and effective radioactive material disposal program;
255 256 257 258	d.	Engaging in multilateral cooperation to identify non-state actors who have acquired or have attempted to acquire materials or resources which may be utilized to create nuclear-based weapons;
259 260 261	e.	Facilitating multilateral collection operations of all available nuclear-based civilian materials from post-conflict and ongoing conflict zones;
262 263	f.	Focusing on mitigation methods to address the danger posed by terrorist organizations;
264 265	19. Further	r invites the NWS to provide Negative Security Assurances (NSAs) to the NWFZ States by:
266 267	a.	Assuring never to use or threaten to use nuclear weapons against any state within a NWFZ;
268 269	b.	Ensuring that they do not transfer nuclear weapons in NWFZs;

- 270 20. *Expressing its appreciation* at the commitment of the Democratic People's Republic of Korea, Japan,
   271 the Republic of Korea, and the United States to negotiate, sign, and ratify a NWFZ in the Korean
   272 Peninsula;
   273
- 274 21. Suggests that all Member States engage in increased discussion and negotiation with Member States
  275 in Latin America and the Pacific, Southeast Asia, the South Pacific, Central Asia, and Africa with the
  276 goal of establishing multilateral agreements, partnerships, and treaties on the topic of nuclear
  277 disarmament;
- 279 22. *Calls upon* all Member States to pursue the creation of regional and global NWFZs in which the
   acquisition, creations, testing, incremental elimination of possession, control, manufacturing,
   research, stockpiling, transport, usage, and hosting of nuclear weapons is outright forbidden;

282

286

287 288

289

293

- 283 23. *Requests* that less developed Member States be provided adequate resources and technology to
   284 bring them into the developed world, allowing them to use nuclear energy for peaceful purposes to:
   285
  - a. Prohibit nations from abusing these resources and developing nuclear weapons;
    - b. Encourage Member States who do not possess nuclear weapons to refrain from developing nuclear weapons and to retain nuclear material for peaceful purposes;
- 290
   291 24. Strongly encourages Member States to recycle low enriched uranium using methods such as the U 292 PU fuel cycle, Thorium-Uranium fuel cycle and PUREX;
- 294 25. *Recommends* regional organizations or Member States cooperate with the United Nations Office for 295 Disarmament Affairs (UNODA) to receive necessary information to build a NWFZ.
- 297 26. Encouraging Member States to fully and collaboratively participate in the upcoming Fourth
   298 Conference of Nuclear Weapons Free Zones and Mongolia in 2020, to offer their regional perspective
   299 on the issue of disarmament and facilitate the growth of NWFZs;
   300
- Requests Member States who have not yet signed or ratified the NPT (1970) as well as the CTBT
   (1996) to do so, as an effort to ensure international security and disarmament of weapons of mass
   destruction.

#### Code: GA1/1/7 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

The General Assembly First Committee,

*Recalling* Articles 1 and 3 of the *Charter of the United Nations*, which affirm the maintenance of
 international peace and security and international collaboration in dealing with economic, social, cultural
 and humanitarian problems respectively,

- Profoundly concerned about the catastrophic humanitarian and environmental consequences following
   utilization of nuclear weaponry, such as deterioration of the ozone layer and anthropogenic climate
   change,
- *Highlighting* the necessity for active participation and contribution of international organizations and
   representatives of civil society in pursuit of civil and multilateral cooperation,
- *Firmly emphasizing* the importance of the *Treaty on the Non-Proliferation of Nuclear Weapons* (NPT) and
   its potential to fortify international security,
- *Recognizing* nuclear weaponry's infringement upon the social, economic, and political prosperity which
   subsequently threatens the peace and security of Member States,
- Reaffirming the peaceful, beneficial, and sustainable potential of repurposing fissile material to prevent
   the malicious acquisition of this material by third party, non-hostile, or non-state actors,
- *Reinforcing* General Assembly resolution 71/258 on "Taking forward multilateral nuclear disarmament
   negotiations," which promotes multilateral discussions regarding nuclear disarmament for the attainment
   and maintenance of nuclear-free world,
- *Emphasizing that* the International Atomic Energy Agency's (IAEA) work is important to reaching the
   Sustainable Development Goals (SDGs),
- *Reminding* the body of the reliance on nuclear energy by both nuclear and non-nuclear states to obtain
   energy besides the dependent sources of other Member States,
- Recognizing the importance of the1979 Conference on Disarmament (CD) as the only multilateral
   disarmament negotiation body and commending past successes, such as the *Comprehensive Nuclear-Test-Ban Treaty* (CTBT) (1996),
- *Regretting* the CD's inefficiency in enabling consensus since the CTBT,
- *Elucidating* the CD's capacity to fortify crucial international frameworks, such as the *Fissile Material Cut-off Treaty* (FMCT),
- 41
   42 *Emphasizing* the need for a vital and active CD to foster debate and promote consensus on international
   43 disarmament,
- 44
- 45 *Cognizant* of the advancements put forth by the United Nations Disarmament Commission (UNDC), an
- institution of the United Nations Office for Disarmament Affairs, on condemning nuclear proliferation to
   fortify international security.
- 48

53 54 Underscoring an unacceptable absence of regulations concerning procedure following disarmament to 55 ensure the safety of nuclear material, 56 57 Expressing intent to preserve international waters as nuclear-free zones in accordance with the United 58 Nations Conventions on the Laws of the Sea (UNCLOS), 59 60 Fully alarmed by the impeded progress surrounding the denuclearization of the Korean Peninsula, 61 62 Recognizing the Nuclear Age Peace Foundation calling for the increase of inclusiveness and cooperation between Member States, 63 64 65 1. Calls upon a consensus to implement the IAEA as an independent intergovernmental inspector for the 66 transportation and development of fissile material, thus ensuring the development of verification 67 systems, guaranteeing civil utilization of nuclear energy and discouraging an increase in military 68 capabilities; 69 70 2. Recommends to the Secretary-General of the UN to propose to the Secretary-General of the CD to: 71 72 a. Put a stronger focus on the impact nuclear weapons have on society, economy, and the 73 environment; 74 75 b. Redefine the working groups inside the CD according to their nuclear capacities by considering: 76 77 Possession of nuclear weapons: Member States such as, (but not limited to) Russia, i. 78 USA, France, UK, India, Pakistan, DPKR, China; 79 Capability of developing nuclear weapons, specifically Member States possessing ii. facilities or reactors capable of refining fissile material to weapons grade: including 80 81 Brazil and South Africa; 82 iii. The possession of nuclear energy reactors: Member States including Argentina, 83 Belgium, Canada, Germany, Hungary; 84 Member States importing nuclear energy or possessing nuclear materials including iv. 85 Australia: 86 No current possession of nuclear reactors or weapons: Member States including v. 87 Bangladesh, Cameroon, Ireland, Austria; 88 89 c. Replace the rule of consensus by the rule of a two-thirds majority when adopting agendas and 90 motions: 91 d. Further facilitate discussions among Member States by: 92 93 94 i. Expanding the number of Member States in the CD particularly among non-nuclear 95 weapons states: 96 ii. Expanding the number of observers States in the CD; 97 Increasing the number of annual conventions from three to four; iii. 98 iv. Requesting the CD to submit a final report to the GA following each of their four annual 99 conventions; 100 101 3. *Requests* the CD to urge all Member States to reinforce: 102 103 a. Safety precautions with the handling of transportation of nuclear weapons; 104

Considering the GA's current capabilities to properly address the denuclearization issue and to propose

Applauding the efforts of the International Campaign to Abolish Nuclear Weapons (ICAN),

49

50

51 52 substantial solutions.

105		b.	Border security and accountability on the part of those exporting and importing nuclear arms;
106 107		•	Continuing reports of steps that are taken by Member States to combat non-state actors from
107 108 109		υ.	obtaining nuclear weapons;
110 111 112	4.		or the limiting of enrichment of fissile material contingent on the signatory status of Member to the NPT o adopt the following revisions:
112 113 114		a.	Non-NPT signatories will be limited to an enrichment level of 25 percent;
115 116		b.	NPT signatories will be limited to an enrichment level of 50 percent;
117 118 119		C.	Nuclear-weapon-states (NWS) will be allowed enrichment of 85 percent for the first year of this treaty;
120 121 122		d.	NWS enrichment level will decrease by 5 percent annually until the maximum enrichment rate of NPT signatories is reached;
123 124		e.	Nuclear enrichment not for the purposes of creating, developing or employing a nuclear warhead or similar device as certified IAEA are excluded from these provisions;
125 126 127 128		f.	All Member States excluded from the aforementioned list are subject to review by the Security Council every 15 years;
129 130 131	5.		Member States to support the IAEA in its efforts to regulate the development of nuclear energy ns, peacefully promoting the SDGs through:
132 133 134		a.	Inviting IAEA inspectors and giving them access to civilian nuclear facilities to regulate the use and good sustainment of these facilities;
135 136		b.	Providing updated annual accurate reports on nuclear facilities and capabilities;
137 138 139		C.	Cooperating in all areas of interest, such as renewable energy, the treatment of disease, agricultural practices, and other critical issues;
140 141	6.	Endors	es an expansion of UNCLOS in order to:
142 143 144		a.	Create a ban on the installation of nuclear facilities in international and contested waters defined by the International Court of Justice (ICJ);
145 146 147		b.	Set an interdiction of the presence of nuclear-powered submarines and vessels in international and contested waters defined by the ICJ;
148 149 150		C.	Establish a ban on the use of nuclear weapons in international and contested waters defined by the ICJ;
151 152 153 154		d.	Encourage Member States' support to urgently accede and ratify the UNCLOS or increase their contribution to the International Maritime Organization, especially the carriage of dangerous goods, solid cargoes and container committee;
155 156 157 158	7.	aimed t	or an assignment of the international standardized status of every Member States' nuclear o increase transparent sharing of nuclear capabilities, which will be available for each 's discretion through IAEA regulation and verification;

- 8. Strongly encourages the prevention of nuclear proliferation, terrorists and criminals from accessing
   dangerous substances and protect the population through strategic lines of action that correspond to
   the area of disarmament and non-proliferation;
- *Urges* Member States to increase the cooperation between one another following the guidelines of
   the Counter-Terrorism Committee in regards of non-state actors acquiring nuclear fissile material and
   devices;
- 10. *Implores* NWS to increase security of stockpiles and transport systems to ensure non-state actors do
   not get hold of materials for production of WMDs;
- 169
  170
  11. *Proposes* the inauguration of a Nuclear Transition Investment Fund, which will attract investors from
  171 the private sector by promoting the investment opportunities in the Nuclear transition;
  172
- 173 12. Urges the Security Council to condemn every Member State who violates current treaties concerning
  174 nuclear energy and fissile material, advancing the NPT's prohibition of the production of fissile
  175 material intended for the manufacture of nuclear weapons, and the new treaty will fall under the
  176 UNDC mandate;
- 178 13. *Recommends* the UNDC to: 179

- a. Collaborate with the General Assembly to raise public awareness concerning the necessity for safety procedures concerning nuclear facility protection;
  - b. Address escalations in nuclear proliferation and drive recommendations for the solvency to the Security Council;
  - c. Reestablish the Six Party-talk initiative under the supervision of the General Assembly to ensure the denuclearization of the Korean Peninsula;
- 14. *Strongly suggests* that the UNDC organizes a special meeting with the topics with a purpose to
   establish a procedural methodology for all Member States regarding the inspection, verification and
   destruction of any nuclear residue and fissile cut-off material.

## Code: GA/1/8 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Reaffirming the purpose of the United Nations (UN) to maintain international peace and security, as 4 stated in the Article 1 of the Charter of the United Nations (UN Charter) (1945), 5 6 Recognizing the humanitarian threat nuclear weapons pose on all States and future generations, as well 7 as the need to educate the youth about nuclear disarmament and its implications, 8 9 Alarmed by the lack of progress in nuclear disarmament, 10 11 Noting the core importance of dialogue, cooperation, and a comprehensive approach to reach nuclear 12 disarmament, 13 14 Emphasizing the role of sovereign equality as outlined in the UN Charter, 15 16 Affirming the importance of monitoring nuclear materials and tests in order to foster a safer world, 17 18 Recognizing that the future of peaceful, nuclear power requires continued supervision of reliable and 19 sustainable sources of uranium, 20 21 Aware of the relevance of Member States' defense capabilities in building trust and confidence, 22 23 Acknowledging that past treaties fail to provide proper economic, social, or environmental incentives to 24 properly combat the continued use and proliferation of nuclear weapons, 25 26 Deeply conscious of the degree to which aggressive blockades and sanctions prevent meaningful work 27 on nuclear disarmament. 28 29 Recalling the sentiments of the Universal Declaration on the Achievement of a Nuclear Weapon-Free 30 World (2015) where all Member States' contribute toward a nuclear weapon-free world, 31 32 Having considered the overwhelming support that the Non-Proliferation Treaty (NPT) has received since 33 its adoption and its goal of nuclear disarmament, 34 35 Guided by the spirit of regional arrangements, as mentioned in Chapter VIII of the UN Charter, 36 37 Fully supporting the mandates established and described in the Treaty on the Prohibition of Nuclear 38 Weapons (TPNW) which forbids the testing, stockpiling, use and development of nuclear weapons, 39 40 Acknowledging the role of the United Nations Institute on Disarmament Research (UNIDR) in the process 41 of gathering information to achieve efficient solutions for disarmament, 42 43 Confident about the importance of using the International Atomic Energy Agency (IAEA) to promote 44 global safety regarding nuclear weapons as stated in the TPNW, 45 46 Mindful of the Member States that are parties to multinational alliances which include States that are in 47 possession of nuclear weapons and their responsibility to fulfill their obligations, 48 49 Underlining the objectives pursued by the IAEA within the Article 2 of its statute.

- 50 51
- 52 proliferation of nuclear weapons and its continuing work in promoting multi-state cooperation in the field of 53 nuclear safety and disarmament awareness, 54 55 Reiterating the importance of bilateral, multilateral and global cooperation as stated in the General Assembly resolution 70/40 on "United Action with Renewed Determination toward the Total Elimination of 56 57 Nuclear Weapons", 58 59 Referring to the Article 33 of the UN Charter on the pacific settlements of disputes, 60 61 Recognizing the progress made in confidence-building strategies by Columbia, Cuba, Ecuador, Georgia, Jordan, Lebanon, Madagascar, Spain, Ukraine and the European Union as discussed in the 72nd 62 63 Session of the General Assembly, 64 65 Appreciating highly General Assembly resolution 71/258 on "Taking forward multilateral nuclear 66 disarmament negotiations" which stresses the participation and contribution of international organizations 67 and civil society to taking forward multilateral nuclear disarmament negotiations, 68 69 Reaffirming the Declaration on Measures to Eliminate International Terrorism, as stated in the General 70 Assembly Resolution 49/60 on "Measures to eliminate international terrorism", 71 72 Noting the objective of the International Convention for the Suppression of Acts of Nuclear Terrorism 73 (2005) to set guidelines for dealing with actors that maliciously use nuclear technology, and to provide 74 clearly defined norms for the treatment of such actors, 75 76 *Calling attention* to the International Day for the Total Elimination of Nuclear Weapons, 77 78 1. Urges all Member States from Latin America and the Caribbean to ratify the Treaty for the 79 Prohibition of Nuclear Weapons in Latin America and the Caribbean (1967) to enhance a nuclear-80 weapon-free region; 81 82 2. Further Urges all Nuclear Weapons States to voluntarily accede to those established treaties which 83 they are yet to accede to, including: 84 85 a. The NPT of 1968, which is a signature piece of legislation including one-hundred ninety-86 one state parties aiming for a nuclear free world and with ratification could effectively 87 cause the demolition of nuclear arms and ammunition; 88 89 b. The TPNW of 2017, which encourages Member States to not participate in or further the 90 creation of nuclear weapons; 91 92 c. The Comprehensive Nuclear Test Ban Treaty of 1996 which prohibits any test for nuclear 93 explosion; 94 95 3. Urges all Member States to reach a consensus within the Conference on Disarmament regarding 96 the Fissile Material Cut-off Treaty, and to include innovative and forward-thinking policies. 97 including economic, social, and environmental incentives for those Member States who decide to 98 ratify the treaty and comply with its terms; 99 100 4. Calls for the establishment of a Countermeasure Disarmament Treaty in order to ensure the 101 effectiveness of Anti-Ballistic Missile (ABM) defense measures by: 102 103 a. Establishing a convention or conference for the drafting and signing of the treaty; 104 105 b. Ensuring cooperation with the IAEA in the verification of Countermeasure status;

Appreciating the effectiveness of the IAEA's safeguards and verification measures in ensuring the non-

a. Establish a Voluntary Expertise Team to assist IAEA to handle nuclear terrorism issues;
157 b. Builds up platform for the dialogue between the intelligence serves and academic
158 institutes among Member States to exchange information;
159
<ul><li>159</li><li>160 11. Urges Member States to work in collaboration with the IAEA and United Nations Office on Drugs</li></ul>

162 163 164			r to receive technical assistance and improve capacity building to strengthen border and limit smuggling of uranium;
165 166 167	12.		the UNIDR to conduct a comprehensive study on all policies, protocols, and treaties ng nuclear disarmament followed by periodic studies every five years with the goals of:
168 169		a.	Cataloging the effectiveness of such measures;
170 171		b.	Using collected data to highlight progress on disarmament;
172 173 174		C.	Guiding future treaties, protocols and policies as well as amendments to existing measures;
175 176 177		d.	Reporting studies to the IAEA, the United Nations Office for Disarmament Affairs (UNODA) and General Assembly;
178 179 180	13.		mends annual regional summits on disarmament and the creation of a bi-annual global t called the Forum for Nuclear Disarmament (FOUND) for the following:
181 182 183 184		a.	Using international governmental organization (IGOs) to host regional summits with IAEA, UNODA and UNIDIR for the purpose of further driving the creation of Nuclear-Weapon-Free Zones (NWFZs) by:
185 186 187 188 189 190 191 192			<ul> <li>i. Setting goals for disarmament measures in the upcoming year;</li> <li>ii. Incentivizing disarmament through economic and research assistance provided by IGOs, non-government organizations (NGOs) and civil societies such as retraining workers currently employed in nuclear arms programs;</li> <li>iii. Evaluating the progress and effects of measure of the past year, by documenting, reporting, and reviewing the state of each participant;</li> <li>iv. Providing space for bilateral and regional discussions with assistance of a neutral party to mediate a constructive dialogue;</li> </ul>
193 194 195		b.	Making a global summit through the IAEA and UNODA, specifically:
196 197 198			<ul> <li>i. Highlighting the success of various Member States toward the goal of NWFZs;</li> <li>ii. Bringing attention to new ideas and issues within existing disarmament frameworks;</li> </ul>
199 200 201 202			<ul> <li>iii. Hosted by a Member State belonging to the General Assembly First Committee;</li> <li>iv. Including different stakeholders such as States, firms, NGOs, and international organizations with a focus on maintaining the principles of sovereign equality as outlined by the UN Charter;</li> </ul>
203 204 205			<ul> <li>v. Proposing the first summit be held in Kazakhstan in 2020 with future locations based on voting with a regional focus;</li> <li>vi. Publishing the result of the formal and non-binding discussion in the form of a</li> </ul>
206 207 208			report transmitted to the First General Assembly to guide the work of the committee;
209 210 211		с.	Funded by the budget of GA5, Member States supporting nuclear disarmament, foundations, NGOs, and firms wishing to sponsor the event;
212 213	14.		rages the establishment of confidence-building measures based on the 2017 Report of A on <i>"Practical confidence-building measures in the field of conventional arms"</i> to:
214 215 216 217		a.	Include seminar workshops, exchange of information, financial and technical assistance facilitated by the IAEA and appropriate regional organizations;

218 219 220	b.	Increase the budget of the IAEA and provide financial participation from regional organizations;
221 222 223	С.	Support increasing the budget of UNODA by 5% in 2025 to aid in promoting nuclear disarmament activities;
224 225 226	with the	r the creation and dissemination of educational programs and a public awareness campaign e purpose of spreading knowledge and educating Member States on the importance and s of disarmament and international security through multilateralism:
227 228 229	a.	By affirming that the program would be tailored to meet the needs of participants;
230 231	b.	By supporting NGOs, employees, and diplomats to encourage them to implement the program;
232 233 234	C.	By encouraging the sharing of knowledge between Member States to educate civil society on multilateralism and disarmament;
235 236 237	d.	By encouraging civilians to educate themselves and become more aware of issues facing nuclear disarmament and international security through:
238 239 240 241 242 243		<ul> <li>i. Expansion of education programs put forth by the IAEA concerning nuclear energy;</li> <li>ii. Giving citizens preventative measures in the event of a nuclear incident, and;</li> <li>iii. States to voluntarily give and receive suggestions to further improve their programs;</li> </ul>
243 244 245 246 247	e.	Promotes the global importance of the annual International Day for the Total Elimination of Nuclear Weapons through public awareness campaigns and education based on UNIDIR's studies in order to:
248 249 250 251		<ul> <li>i. Educate the public on the global state-of-affairs regarding nuclear capabilities with extensive social media campaigns headed by the IAEA;</li> <li>ii. Foster a global culture on peace and the continuing reduction of nuclear stockpiles by partnering with social media companies resulting in increased public pressure;</li> </ul>
252 253 254 255 256 257	Genera vision	s to the UN High Representative for Disarmament to make a joint commitment with the I Secretary to facilitate a dialogue between Member States that can give them a common of total disarmament in compliance with the Agenda 2030 in achieving peace and ional security;
		all Member States to act within the spirit of cooperation and diplomacy, and to refrain from g aggressive and unnecessary sanctions and blockades that impede international work on ic;
262 263 264	Korea a	<i>con</i> the UN to support a renewed cooperation between Democratic People's Republic of and other NWS by setting specific confidence-building measures through a meeting with State along with the Secretary General as the mediator;
265 266 267 268	organiza	ages all Member States to prioritize accountability and transparency so that international ations and civil society can confirm that nuclear disarmament procedures are conducted in ropriate Member States.

## Code: GA1/1/9 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Emphasizing the essential role of the General Assembly (GA) First Committee as outlined in Article I of 4 the Charter of the United Nations (UN Charter) (1945) to maintain international peace and security. 5 6 Alarmed by the lack of knowledge in matters of nuclear weapons, which further contributes to the lack of 7 potency for solutions on the issue of non-proliferation, 8 9 Concerned by the fact that one billion people lack access to electricity which contributes to the widening 10 gap in resources amongst Member States, 11 12 Deeply Convinced of the vital importance of addressing nuclear disarmament and international security on a transnational level to promote interdependence amongst states, 13 14 15 Bringing to attention that Low Enrichment Uranium (LEU) is a main ingredient in fabricating nuclear fuel 16 and can be safely stored for many years, 17 18 Reiterating the power of financial incentive in fostering the promotion of proactive plans that fosters 19 disarmament, 20 21 Recalling General Assembly resolutions 72/34 of 2017 on "Regional Disarmament and Security," 71/258 22 of 2016 on "Taking Forward Multilateral Nuclear Disarmament Negotiations," and 55/33 of 2001 on 23 "General and Complete Disarmament, 24 25 Fully Aware that the proliferation of nuclear weapons is not compliant and non-compatible with the aims of key Sustainable Development Goals (SDGs) as outlined in the Agenda 2030. 26 27 28 Recalling the aims of the Nuclear Non-Proliferation Treaty (NPT) to provide technologies and confidence 29 building measures to Member States for the peaceful use of nuclear energy, 30 31 Deeply concerned by the lack of assistance in providing technological availability promised to NPT 32 signatory states, which can further provoke the nuclearization of states, 33 34 Noting the efforts of Security Council Resolution 1540 (2004) on emphasizing the prevention of nuclear 35 weapons and fissile material from falling into the hands of non-state actors, 36 37 Reaffirming the responsibility of the GA to ensure the safety of all citizens threatened by the unsafe 38 exploitation of uranium deposits especially at the hands of non-state actors by utilizing programs from 39 existing bodies such as the United Nation Industrial Development Organization (UNIDO), 40 41 Understanding that the utilization of nuclear energy in productive methods can become a catalyst for both 42 domestic and regional economies as outlined in SDG 8 of the Agenda 2030, which promotes and 43 sustains inclusive and sustainable economic growth and development, 44 45 Cognizant of the efforts of the Organization for Economic Co-operation and Development (OECD) Development Assistance Committee (DAC) to promote policies for the improvement of social well-being, 46

47 48 Acknowledging CrunchBase and other online databases that provide in finding business information 49 about private and public companies which includes investments and funding information, mergers and 50 acquisitions, and vested interests as well as industry trends, 51 52 Noting the mission of the Global Opportunities for Long-Term Development (GOLD) program to source 53 sustainably and securely within in the mining industry and have a presence around the world, 54 55 Reaffirming the Program of Action for Cancer Therapy (PACT) for the litigation it provides in the field of 56 ethical cancer research by implementing guidelines focused on the guality of patient care, 57 58 1. Calls for the repurposing of materials extracted from nuclear weapons to be allocated for the 59 continued utilization of the LEU Bank under the International Atomic Energy Agency (IAEA) which 60 will; 61 62 a. Trade and provide monetary incentives based on studies previously done by the LEU Bank, that will provide them with accessible LEU for projects that promote affordable and clean 63 64 energy; 65 66 b. Assist Member States without nuclear energy facilities by crafting renewable energy programs based on said studies which will provide competitive prices to make nuclear energy 67 68 more affordable than searching for local nuclear energy sources that may be dangerous to 69 local habitats; 70 71 c. Recommend the continued utilization of the OECD DAC in its efforts to combat the adverse 72 effects of nuclear disasters on areas of economic development while promoting the 73 incorporation of SDG 8 stipulated in the Agenda 2030; 74 75 2. Further encourages the creation of locally based individual Nuclear Regulatory Board which will assist 76 in the monitoring of each nuclear power generation plant, whether public or private, and will 77 communicate with their respective governmental bodies to meet national and international 78 regulations, set by the IAEA, for; 79 80 a. The insurance of up to date codes and standards with account to national development 81 goals; 82 83 b. Administrative and legal records, building permits, safety design, testing, and management 84 services: 85 86 i. Ensuring that large scale safety testing occurs monthly at each facility: 87 ii. Making safety a priority and using safety as a progress measurement method; 88 89 C. Regular inspection and enforcement including; 90 91 i. Quality and 'green assurance', ensuring that resources are sustainably sourced and 92 processed effectively: 93 ii. Construction and operations inspection; Emergency and natural disaster simulation and safeguards; 94 iii. 95 Physical protection inclusive of physical health, welfare, and safety; iv. 96 97 3. Calls upon the creation of nuclear waste facilities to recycle non-detonated nuclear material from nuclear weapons to use as fuel sources by implementing measures which would; 98 99 100 a. Create a closed loop fuel system by using plutonium as a low-efficiency fuel sub: 101

102 103		b.		alt-60 as a byproduct of the nuclear fission process within a nuclear reactor to be matters such as medical imaging due to the fact that;
104 105				Cobalt-60 has a low radioactivity level and is considered a 'normal exposure'
106 107				material; It can be sold by nuclear power generating facilities to increase sustainability efforts
108				while saving otherwise wasted revenue and resources;
109	4	0	- ( -	
110 111	4.			lization of the UNIDO programs which provides security to uranium mines within ns against potentially malicious actions by non-state actors or belligerent state actors
112		by;	onig natio	
113		-		
114		a.		g developing states with the necessary resources in the form of predefined protection
115 116				isms and a direct contact link to officers of the IAEA responsible for supporting states ctionist actions if necessary, establishing greater safety and security including;
117			in protoc	Alonio additiono in hobobodily, obtabliching groater ballety and obbarry including,
118				Comprehensive training for security workers at uranium mining sites and nuclear
119				plants; Dequired materials for the construction of proper acquirity measures at uranium
120 121				Required materials for the construction of proper security measures at uranium mining sites and nuclear plants;
122				
123		b.		g developing states in creating comprehensive border regulations to better prevent
124			the spre	ad of hostile non-state actors;
125		•	l Itilizio a	(COLD) under LINIDO as an expert outbority on mining ouetoinshility, tenegrenhicel
126 127		C.		(GOLD), under UNIDO as an expert authority on mining sustainability, topographical ge and good practice;
128			in owned	
129		d.		nending that the Fifth Committee of the UN GA prioritizes monetary funding for
130			assisting	g developing states in protecting uranium mining sites and nuclear plants;
131 132	5.	l Iraes i	the collab	oration amongst all Member States to share knowledge and build capacity by:
133	0.	Cigee		
134		a.	Encoura	iging all Member States to share information to IAEA databases;
135			_	
136 137		b.		iging information sharing of nuclear energy technologies by way of spreading ge, information, and awareness through the implementation of;
138			KIIUWIEU	ge, mornation, and awareness through the implementation of,
139			i.	Voluntary transnational databases such as the Advanced Reactors Information
140				System, the International Nuclear Information System, and the Nuclear Data Services
141				to provide developing Member States with advanced nuclear plant designs and best
142 143				practices for the peaceful use of nuclear energy development and consumption; A multi-stakeholder model of collaboration amongst Member States, private entities,
144				and the public sphere to achieve the trading of imperative nuclear technologies and
145				capabilities;
146				Nuclear energy resources as an alternative fuel source with priority made available to
147				developing Member States;
148	~	<b>-</b>		and the structure to the first second to be second to second to second the second to the ODOs
149 150	6.			use of nuclear technology for humanitarian purposes in accordance with the SDGs, regulations and practices to promote;
151				regulations and practices to promote,
152		a.	The use	of nuclear technology as a method of cancer treatment and detection;
153		-	<b>–</b>	
154 155		b.		ation of seawater to provide clean water to the twenty percent of the world's on that does not have access to it;
155			populatio	

157 158 159 160 161		C.	Deep space exploration, utilizing the generators in unmanned spacecrafts by using the heat from plutonium to generate electricity and operate unattended for years. This reliable, long-term source of electricity powers these spacecrafts, even as they venture deep into space, such as in the case of the Voyager 1;
162 163 164 165		d.	Providing uranium, thorium and other essential resource deposits to lend to research, mining practice, and development of these materials into technologies serving the humanitarian purpose;
166 167 168 169		e.	Biannual reports of national research centers provided by Member States that address matters relating nuclear technology and to share new developments with the international community and ensure universal accessibility of research findings;
170 171 172	7.	(UNOE	sts the consideration a new ad-hoc committee under the UN Office on Drugs and Crime DC), specifically the Uranium Monitoring Committee, which will be mandated with the oversight otection of uranium mines and will;
173 174 175 176		a.	Develop an annual index which will rank regions with uranium mines based on the stability of the region and vulnerability of the mine from non-state actors;
177 178		b.	Monitor all uranium extraction activities in mines;
179 180		C.	Provide biannual reports to the GA regarding the extraction of uranium ore;
181 182 183		d.	Collaborate with the Security Council 1540 committee to ensure that the uranium mines are safe from non-state actors;
184 185 186 187	8.	educat	rts the movement and creation of more nuclear-free zones, summits and peace talks, global ion initiative on the threat of nuclear weapons, as well as platforms for international ations and treaties on the topic of non-proliferation;
188 189 190	9.		eses its hope that Member States continue in their efforts to ratify the <i>Treaty of Prohibition of</i> or <i>Weapons</i> (2018), by fully eliminating all military usage of nuclear technology;
191 192 193	10	to aide	<i>mends</i> UN Organizations such as the IAEA, as well as other affiliated entities like CrunchBase with funds specifically directed towards the dismantling and disarmament of nuclear weapons act nuclear material to be used for nuclear power generation.

## Code: GA1/1/10 Committee: The General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 2	The General Assembly First Committee,
2 3 4	Expresses its concern for all Member States struggling with the effects of nuclear proliferation,
5 6 7	Acknowledges the power that nuclear weapons contain and the threat that they pose to any Member State they are used against,
8 9 10	<i>Urges</i> all Member States to act within the spirit of cooperation and diplomacy and to refrain from enacting aggressive and unnecessary sanctions or blockades that impede the international work on this topic,
11 12 13	Consciously notes that many current nuclear-weapon Member States will not completely disband their nuclear arsenals,
14 15 16	<i>Further deplores</i> the detrimental effects of the use of nuclear weapons as a response of sovereign state conflicts,
17 18 19	Deeply conscious of the degree to which aggressive blockades and sanctions prevent meaningful work on nuclear disarmament,
20 21 22	<i>Reminds</i> all Member States that nuclear testing has been historically conducted on Small Island States for decades,
23 24 25	Views with appreciation the attempts of the Treaty on the Prohibition of Nuclear Weapons (2017) and the International Campaign to Abolish Nuclear Weapons of 2017, and hopes to expand their attempts at global non-proliferation,
26 27 28 29 30	Recalls the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) (1968) and the Comprehensive Nuclear-Test-Ban Treaty (1996) in reference to nuclear disarmament, as the foundational documents with the aim of denuclearization and global peace and security,
31 32 33	Welcomes improvements upon the implementation of treaties such as the NPT and the Intermediate- Range Nuclear Forces Treaty (1987) to protect from emergency happening on the Korean Peninsula,
34 35 36 37	<i>Re-emphasizes</i> the sovereignty of Member States and their ability to hold nuclear capabilities, especially with regard to all current nuclear-weapon and nuclear-capable Member States, and also hopes that Member States will remain guided by "Atoms for Peace",
38 39 40 41	<i>Recognizes</i> the role of the 2030 Agenda for Sustainable Development, specifically Sustainable Development Goal (SDG) 16.8 to broaden and strengthen the participation of developing countries in the institutions of global governance,
42 43 44 45	<i>Notes</i> the current responsibilities of the International Atomic Energy Agency (IAEA) toward monitoring the disarmament process of nuclear weapons and the <i>Comprehensive Nuclear-Test-Ban Treaty</i> (1996), which is a fundamental step toward the abolition of nuclear weapons,
46 47 48	<i>Understands</i> the need of Small Island Developing States (SIDS) and other Member States to have a network of fiber optic cables in a stable telecommunications network,

49 Remembers the Secretary-General's five-point proposal on nuclear disarmament, that provides Member 50 States and, mostly, nuclear Member States to increase their bilateral and multilateral negotiations to 51 pursue the objective of nuclear disarmament, 52 53 Bears in mind the IAEA program "Establishing Nuclear Security Infrastructure for a Nuclear Power 54 Program" (2015), which lays the foundation for safely and sustainably developing Nuclear programs, 55 including waste management, transportation of fissile materials, and safety standards, 56 57 Observes that access to clean water is becoming more and more difficult every day. The alternate source 58 is seawater desalination. World fossil fuel is at a critically low level so nuclear energy is the next source of 59 energy, 60 61 Stresses its desire to propose an expansion toward technological expertise for development of a nuclear 62 monitoring system in conjunction with the United Nations Internet and Technology for Equitable 63 Development-Creating Oases Around SIDS for Tomorrow's Security (UNITED-COASTS) Framework, 64 using such technological software, that is required for UNITED-COASTS to work, 65 66 Urges all Member States to support the creation of the new framework, UNITED-COASTS 1. 67 Framework, which is: 68 69 a. A two-armed approach to multilateral sustainable development needs specific to SIDS, and 70 expanded for all Member States, consisting of two separate sectors (UNITED and COASTS) 71 working in conjunction with existing UN bodies such as the IAEA; 72 73 b. Including specifically the addition of more and better fiber optics cable networks to all 74 Member States, the creation of cyber blocks to limit and remove cyber threats that are visible 75 because of such networks, implementing a new nuclear monitoring system, making a 76 program to turn nuclear capabilities into energy, and building an early warning disaster 77 system; 78 79 c. Engaging with the specified private companies and Member States who maintain these 80 cables currently so that all involved can remember the impact fiber optic cables have on the 81 world; 82 83 d. UNITED-COASTS is beneficial for all participating Member States ensuring international 84 security and unison in thought; 85 86 e. Use UNITED-COASTS to create a safer world, seeing too that funding for UNITED-COASTS 87 will come primarily through several private organizations, such as the Banco de Brazil, 88 Alphabet, and Toyota Motor, as well as UN agencies such as the International Renewable 89 Energy Agency, the United Nations Conference on Trade and Development, the IAEA, and 90 UN-Energy; 91 92 2. Further encourages current nuclear and nuclear-capable Member States to limit the creation of 93 nuclear weaponry by signing on to and ratifying the NPT and the Comprehensive Nuclear-Test-Ban 94 Treaty (1996); 95 96 3. Suggests that the Conference of Disarmament promotes general and complete disarmament through 97 adoptions and ratifications of the annual theme by specifically: 98 99 a. Readjusting the annual agenda by increasing debate through multilateralism; 100 101 b. Pushing for such disarmament by the 2035 UN session by inviting Member States to reduce their armaments proportionally to the size of their arsenal and introducing advantages for the 102 103 Member States that implement this; 104

105 c. Using disarmed nuclear armaments to create clean nuclear energy and further using the 106 IAEA Peaceful Use Only of Nuclear Weapons clause: 107 4. Establishes a QR code system that is administered by the IAEA and would monitor how Member 108 109 States would manufacture, sell, and distribute any existing and future nuclear fissile materials, which 110 would also hold Member States accountable for the agreements that were made and continue to 111 promote international security through technological measures; 112 113 5. Encourages Member States to protect the marine ecosystem of small islands all over the world, which 114 is where the majority of nuclear tests are conducted, through the strengthening of the controls on 115 nuclear Member States by implementing both the budget and the tasks of the already existing IAEA; 116 117 6. Further reminds Member States that they have the set task of SDG 16.8 in strengthening the 118 multilateral participation of developing Member States in pursuing nuclear proliferation; 119 120 7. Reminds all Member States that technological advancements help prevent missteps in the nuclear 121 field, especially education of the youth and advancement for a cleaner, more responsible future; 122 123 8. Calls for the expansion of the provisions of the IAEA through UNITED-COASTS, giving it enforcement 124 power over disarmament of nuclear weapons of the nuclear Member States, thus passing on the 125 responsibility of complete disarmament to the IAEA from the nuclear Member States on a voluntary 126 basis, and also to have random checks by the UN on any nuclear-capable Member States; 127 128 9. Fully supports open discussion among Member States to address concerns and beliefs that 129 respectively fulfill the set agenda by creating multi-tiered summits for such discussion: 130 131 10. Recommends to all nuclear Member States that they shall consider limiting production of such 132 weaponry in order to create a safer world, nor shall they use them against Member States who do not 133 have such capabilities; 134 135 11. Suggests the designation of certain Member States to become accountability checks on nuclear Member States to ensure the process of disarmament remains constant until the United Nations 136 137 Office of Disarmament Affairs goals of disarmament are met; 138 139 12. Proposes a spirit of cooperation and education in the recent advancement in nuclear energy and nuclear waste management, together in accordance with the IAEA's Radioactive waste and spent 140 141 fuel management standards in order to eliminate the majority of nuclear waste from energy 142 production through the following recommendations by nuclear researchers and experts: 143 144 a. Utilizing advancements in nuclear containment and reduction; 145 146 b. Encapsulating non-reusable nuclear waste in a multi-layer case for cooling and containing 147 nuclear radiation; 148 149 c. Using water to reduce the temperature and offer the first level of radiation damping, encasing 150 in glass which further blocks radiation while allowing low-level heat transfer, surrounded by 151 concrete to further absorb heat transfer add rigidity and a final stage of steel which is 152 impermeable for the radiation and furthering the strength of the overall structure; 153 154 13. Determined to establish a zone free of nuclear weapons and any other weapons of mass destruction in the Middle East through the use of the NPT; 155 156 157 14. Encourages sharing peaceful nuclear energy technology with states that have met the following 158 criteria: 159 160 a. Developing nuclear energy capabilities;

161 162 163 164	<ul> <li>Do not provide assistance to non-state actors seeking to obtain weapon-grade nuclear material;</li> </ul>
165	15. Have thus signed and ratified the NPT;
166	
167	16. Further Encourages research in the sector of nuclear fusion that is:
168	
169	a. A clean way to produce large amounts of energy by creating a specific forum inside the IAEA
170	to start facing and solving one of the most relevant issues of recent years: green energy;
171	
172	b. Creates a place where Member States can peacefully meet and work together, building up a
173	strong trust among them, which could then be the start of fruitful cooperation for the future.

1 2	The General Assembly First Committee,
- 3 4	Fully aware that nuclear weapons still exist, are manufactured and tested in our world,
5 6	Alarmed by the 16,123 nuclear warheads currently present in the world,
7 8	Expressing the appreciation that nuclear disarmament is a priority for the United Nations,
9 10	Hoping that all Member States are willing to support nuclear disarmament in order to achieve peace,
11 12	Acknowledges the historical significance of 6 August as the anniversary of the Hiroshima tragedy,
13 14	Understands the importance that the No First Use Policy (NFU) plays in a nuclear conflict,
15 16 17	<i>Recognizing</i> the importance of disciplining Member States that violate treaties and nuclear disarmament goals as well as Member States that develop nuclear weapons illegally,
18 19 20	Understanding the importance of international co-operation to achieve total eventual nuclear disarmament,
21 22 23	<i>Recognizing</i> that finding a compromise between Members States' foreign and domestic policies is key in achieving nuclear disarmament,
24 25 26	<i>Fully aware</i> of the importance of ensuring that all official nuclear-weapon-states support any erasures to disarm nuclear weapons,
27 28 29	Understanding the importance of ensuring that the respective bombings of Hiroshima and Nagasaki are not repeated anywhere in the world,
30 31 32	<i>Recognizing</i> the importance of educating future generations regarding the bombings of Hiroshima, Nagasaki, and the disasters of Chernobyl and Fukushima,
33 34 35	Condemning the development of any and all nuclear arms/nuclear arms programs by and Non-Nuclear- Weapon-States (NNWS),
36 37	Understanding the need to establish a neutral body to ensure nuclear disarmament goals are met,
38 39	Recognizing the need to revise, revive and re-develop previous nuclear disarmament treaties/policies,
40 41 42	Recognizing the discrepancies between Member States' domestic and foreign policy regarding nuclear weaponry enrichment levels,
43 44 45 46	<i>Noting</i> with satisfaction the collaboration between all of the Permanent 5 Security Council Member States (P5) of the United Nations with the state of Japan, as the only current, as of 17 April 2019, victim of nuclear warfare,
47 48 49	<i>Recalling</i> further the International Atomic Energy Agency's (IAEA) role in procuring the peaceful use of nuclear energy,

50 Guided by the binding agreements outlined in the Non-Proliferation Treaty (NPT), the Nuclear Weapon 51 Free Zone Treaty (NWFZT), and the Comprehensive Nuclear-Test-Ban Treaty (CTBT). 52 53 Reaffirming the confidence-building measures outlined in General Assembly resolutions 48/75 (1993) on 54 "General and complete disarmament" and 65/65 on "Calling on states to immediately begin negotiations" 55 regarding the Fissile Material Cut-off Treaty (FMCT), 56 57 Desiring the updating of the outdated list of Member States recognized as Nuclear-Weapon-States 58 (NWS) and NNWS, 59 60 1. Encourages the international community to ratify an international goal starting on 6 August 2020 to achieve by 6 August 2050 a 10% reduction of nuclear arms by NWS as a confidence-building 61 62 measure towards eventual total disarmament, 63 64 2. Requests the compulsory attendance of NWS, nuclear weapons sharing states and NNWS at bi-65 annual nuclear disarmament summits facilitated and organized by the United Nations Office of 66 Disarmament Affairs beginning on 6 August 2020 to: 67 68 a. Further the cause of nuclear non-proliferation to establish good faith in the context of nuclear 69 disarmament: 70 71 b. Provide diplomatic opportunities for NWS, nuclear weapons sharing states and NNWS to 72 interact in the interest of nuclear disarmament to achieve the 2050 partial disarmament goal; 73 74 c. Ensure that progress is being made towards ratified partial disarmament goals/goals ratified 75 by NWS; 76 77 d. Provide a platform for sharing information, progress updates and reports, technology talks, 78 education regarding Hiroshima and Nagasaki, remembrance events, etc. in the context of nuclear warfare and disarmament; 79 80 81 e. Renegotiate the next partial disarmament goal on the bi-annual nuclear disarmament summit 82 on 6 August 2050 where the goal expires; 83 84 With events including, but not limited to: f. 85 86 i. Educational workshops to educate Member States regarding the process of 87 denuclearization, new methods to efficiently denuclearized, re-using nuclear 88 materials for agricultural and clean purposes, and all other aspects of 89 denuclearization; 90 ii. Remembrance events including, but not limited to, ceremonies, talks, and discussions, signifying and respecting events including, but not limited to, the 91 92 Nagasaki bombing, the Hiroshima bombing, the Chernobyl disaster, and historic signing of nuclear disarmament treaties (NPT, NWFZT and CTBT); 93 Discussion forums to provide Member States with the opportunity to discuss issues 94 iii. 95 and topics related to nuclear disarmament and security; 96 iv. A council dedicated to facilitating discussion between officially recognized and 97 declared nuclear-weapon-states and the sharing of strategic information, such as 98 official numbers of nuclear weapons possessed by NWS and the number of weapons affected by the 10% reduction goal between NWS acting as witnesses not privy to 99 100 strategic NWS information; 101 102 g. At alternating locations within NWS and non-NWS respective territories as selected by a random ballot 6 months prior to the first summit and in the following summits will be selected 103 104 during the summit; 105

- 106 3. Requests that the Secretary General to issue a report regarding the list of NWS, originally established 107 in the NPT in 1968, considering updating it in accordance with Member States known to possess 108 nuclear weapons programs, or known to possess nuclear weaponry, or known to be in possession of 109 fissile material enriched at 85% and over, illegally or legally, as of 16 April 2019, with the support of 110 General Assembly First Committee mandate, organizational support from the United Nations Office 111 for Disarmament Affairs and the current NWS, as of the 16 April 2019, according to the NPT 112 consisting of, the People's Republic of China, the Republic of India, the United States of America, the Islamic Republic of Pakistan, the Russian Federation, the United Kingdom of Great Britain and 113 Northern Ireland, the French Republic, and the Democratic People's Republic of Korea; 114
- 115
  4. *Establishes* an international standard definition of weaponized fissile material (plutonium and uranium), to be set at 85% enrichment (as agreed as a compromise between The Russian Federation and the United States' guidelines) and prohibits the creation of weaponized fissile material above 85% enrichment as a good faith gesture to achieve partial disarmament goals, with the presentation and inspection of dismantled nuclear weapons executed by Japan—which will be acting as a neutral state to verify the denuclearization of weapon stocks according to partial disarmament goals/disarmament goals as a gesture of good faith to Japan as the only victim of nuclear warfare;
- 123
  124 5. *Recommends* that the agencies of the United Nations (UN) work with the applicable UN committees and with Member States to provide, through the IAEA, monetary support and technical know-how to all Member States that are willing to disarm to facilitate partial disarmament goals;
- 127
  128
  6. *Calls* upon all Member States to sign and ratify the CTBT in order to ensure that the development/experimentation of nuclear weapons is truly halted as a good faith measure to eventual achievement of total disarmament;
- Encourages further talks regarding re-negotiating the 1987 Intermediate-Range Nuclear Forces
   Treaty between Russian Federation and the United States in order to update and revive the treaty as
   the basis of future nuclear disarmament;
- *Encourages* NWS to follow an NFU Policy and publicly state as such in accordance with the
   precedent of Security Council Resolution 984 (1995) on 'Assurances to non-nuclear-weapon-states';
- Endorses the disciplinary action that the Security Council may take against *N*NWS through strong sanctions and embargos when seen in breach of nuclear disarmament goals, treaties and when discovered to be developing a nuclear arms program/nuclear arms;
- 10. *Expresses* its hope for Member States to sign previously proposed treaties such as the *Fissile Material Cut-off Treaty* (FMCT) which would be implemented step by step;
- 145
  146
  11. *Calls* upon Member States to view partial disarmament goals as a confidence-building exercise to achieving eventual total disarmament or at the very least major disarmament activities by NWS;
- 148
  149
  12. *Deplores* any further advancements in nuclear arms programs in breach of the CTBT and any ratified nuclear disarmament goals;
  151
- 13. *Reiterates* its call upon all Member States to sign and ratify the NPT in order to update and revive the treaty as the basis of future nuclear disarmament;
- 154

131

14. *Encourages* negotiations between the recognized NWS with the goal of creating further disarmamentagreements.

## Code: GA/1/12 Committee: General Assembly First Committee Topic: Nuclear Disarmament and International Security

1 The General Assembly First Committee, 2 3 Guided by General Assembly resolutions 73/86 on "The Comprehensive Nuclear-Test-Ban Treaty", 73/70 4 on "Accelerating the implementation of nuclear disarmament commitments", 73/68 on "Ethical imperatives 5 for a nuclear-weapon-free world", 73/47 on "Humanitarian consequences of nuclear weapons", 6 7 Noting that the United Nations (UN) Human Rights Council (HRC) has collaborated with different 8 humanitarian working groups, 9 10 Deeply concerned by the humanitarian consequences of nuclear armed conflicts and recognizing that peace, security, and development are mutually reinforcing in the prevention of nuclear disarmament, 11 12 13 Alarmed by the infringement on peace, security, and development as a result of nuclear activity 14 due to lack of collaboration with Civil Society Organizations (CSO), such as the International Campaign to 15 Abolish Nuclear Weapons (ICAN), 16 17 Recognizing the need to support capacity-building and cooperation at regional and sub-regional levels 18 in maintaining international peace and security while combatting the adverse effects of nuclear weapons 19 on the environment, 20 21 Stressing the need for participation and contribution of international organizations and civil society 22 representatives working toward the fundamental mechanisms required to resolve the issue at the core 23 while integrating human rights values, 24 25 Emphasizing the importance of the international community to promote the depolarization of regions 26 pertaining to the Global North-South, 27 28 Acknowledging the lack of quantitative information within the UN-Oceans, which has consequently 29 hindered the nuclear testing initiatives pertaining to the Oceanic Molecular Balance in accordance with 30 the Nuclear-Test-Ban Treaty (NTBT) (1970), 31 32 Noting the establishment of the safeguards adopted by the International Atomic Energy Agency (IAEA) in 33 Article XII of the IAEA Statue in order to legitimize the cooperation of the NPT, 34 35 Cognizant of the necessity to implement the Sustainable Development Goals (SDGs) of the 2030 Agenda 36 in order to eradicate the potential security risks to the generation of nuclear energy, 37 38 1. Recommends the creation of an open-ended working group that would work under the UN HRC and 39 will be the official working group on the humanitarian impacts of nuclear activity, such as 40 experimentation and testing, and international peace and security which will be mandated with: 41 42 a. Encouraging the safety of citizens of respective Member States who are affected by nuclear 43 activity through collaboration within the working group; 44 b. Providing practical information through attendance of the working group to the international 45 community in its efforts to promote nuclear disarmament, primarily in conflict-affected and 46 fragile states: 47 Operating with Member States and regional organizations to create a framework that C. 48 operates in compliance with the political, societal, and cultural status of the respective Member State: 49

50 51		d.	Assisting Member States to maintain democracy, freedom, and transparent nuclear energy production;	
52 53		e.	Requesting the Universal Periodic Review to review the human rights of affected Member States to guarantee that the institutions adhere to the human rights protocols;	
53 54				
55 56			<ul> <li>Consist of the Member States of the UN, specifically those affected by nearby nuclear activity;</li> </ul>	
57 58			<ul> <li>Be located in Oslo, Norway due to its accessibility to nuclear material;</li> <li>Refer funding to Fifth Committee of the GA;</li> </ul>	
59 60 61 62			iv. Operate indefinitely until there is a formal agreement on the sustainable uses of nuclear energy that are in accordance with UN Declaration of Human Rights (UNDHR);	
63 64 65	2.		es the importance of establishing effective and comprehensive strategies of conflict tion by suggesting an adoption of rules and procedures for Member States to abide by as it	
66 67 68		a.	Avert negative developments in the security, economic, social and humanitarian sectors;	
69 70 71		b.	Be in conjunction with the field of governance and human rights in Member States which are facing crisis;	
72 73 74		C.	Cooperate with regional UN bodies and stakeholders within such regions and direct attention toward supporting geographical offices with tactics and measures to suppress;	
75 76 77	3.		or the inclusion of all Member States as it will further increase the ability for them to have to nuclear energy by:	
78 79 80		a.	Collaborating with ICAN, which has held multiple platforms fostering dialogue regarding the humanitarian impact that nuclear weapons pose;	
81 82 83		b.	Cooperating with CSOs to further promote the implementation of capacity-building strategies that affect Least Developed Countries (LDCs);	
84 85 86 87	4.	nuclea human	esses hope that Member States who have nuclear programs or who are heavily reliant on r energy employ an aura of transparency in information sharing and knowledge transfer on the itarian implications of the potential destructive impact nuclear energy perpetuates within the sphere by the:	
88 89 90 91		a.	Usage of a database that will promote cooperation of all Member States that are interested in revising their nuclear energy program;	
92 93 94		b.	Sharing of information that will bring awareness to Member States regarding the benefits of nuclear energy as well as the danger of nuclear weapons on the environment;	
94 95 96 97 98 99	5.	cooper the pla	<i>ly encourages</i> Member States to ensure security of nuclear energy facilities through consistent ation with the IAEA through the inspection of the usage of nuclear power plants and to ensure cement of nuclear power facilities are not proximal to civilian locations as logistically and ally possible;	
100 101	6.	Supports the placement of strong restrictions on nuclear weapon testing through the implementation of set locations, time of year, and limits on nuclear testing to ultimately end them;		
102 103 104 105	7.	. <i>Recommends</i> UN-OCEANS to conduct research of the effects that nuclear testing has on the following:		

106 107 108 109 110		a.	Salinity and other aspects of the ocean that are prone to the immediate environmental impacts of nuclear testing in the ocean, sustainability of the ocean's long-term ability to provide for human necessity through the dependence on fishing, tourism and recreation, and natural gas release into the environment;
111 112		b.	Location of nuclear testing with regards to annual ocean statistics;
113 114 115	8.		es the importance of Member States to promote the capacity-building and information sharing sage of nuclear weapons by establishing by:
116 117 118		a.	Forming regional conventions to discuss the imminent threat nuclear weapons pose to the global community;
119 120 121		b.	Promoting platforms that strengthen education, transparency, and capacity-building measures that will primarily assist LDCs;
122 123 124	9.	<i>Empha</i> by:	sizes the need to bridge the divide between polarizing regions such as the Global North-South
125 126 127		a.	Implementing workshops in multiple regions between Member States through an international pathway, as it will further transparency and cooperative initiatives;
128 129 130		b.	Exchanging knowledge through the creation of a global platform which will bridge the divide between the Global North-South and thus promote triangular cooperation;
131 132 133	10.	fifth pills	sts that a reasonable percentage of the funds seized from nuclear activity be used to create a ar for the <i>Strategy of the 2030 Agenda</i> that focuses on financing infrastructure (SDG 9) and g sustainable schools and communities (SDG 11) in areas crippled by nuclear disasters.
