Economic and Social Council Plenary
Background Guide 2022

Written by: Alliyah L. Edwards and Allison C. Uhrick, Directors
Matthias Burtscheidt and Filippo Maria Margheritini, Assistant Directors

NATIONAL MODEL UNITED NATIONS

nmun.org
Dear Delegates,

Welcome to the 2022 National Model United Nations New York Conference (NMUN•NY)! We are pleased to introduce you to our committee, the Economic and Social Council Plenary (ECOSOC Plenary). This year’s staff are: Directors Alliyah L. Edwards (Conference A) and Allison Uhrick (Conference B), and Assistant Directors Matthias Burtscheidt (Conference A) and Filippo Maria Margheritini (Conference B). Alliyah holds two Bachelor of Arts in Criminology and Political Science, and is pursuing a Masters of Arts in Criminal Justice Administration. Allison holds a Bachelor of Arts in Political Science and International Affairs. Filippo holds a Bachelor of Arts in International Studies and recently obtained a Masters in Middle East, Caucasus, and Central Asia Security Studies, and plans to pursue a career with international organizations. Catherine is a junior at the University of New Haven studying International Affairs with a minor in Criminal Justice.

The topics under discussion for the ECOSOC Plenary are:

1. Realizing Sustainable Economic Growth by Achieving SDG 8
2. Strengthening Partnerships for Sustainable Development in Least Developed Countries

As a principal organ of the UN, ECOSOC coordinates the activities of 14 specialized agencies, 13 regional and functional commissions, and over 3,900 civil society actors by commissioning studies and reports, monitoring the implementation of activities and initiatives, and encouraging cooperation and coherence among policy actions. In addition, ECOSOC coordinates funding mechanisms and takes the lead role in formulating policy goals and frameworks for short and long-term programs, placing particular emphasis on achieving the Sustainable Development Goals by 2030. To accurately simulate the committee, it will be important for delegates to focus on ECOSOC’s coordination and policy guidance role, as opposed to the activities carried out by ECOSOC’s subsidiary bodies.

This Background Guide serves as an introduction to the topics for this committee. However, it is not intended to replace individual research. We encourage you to explore your Member State’s policies in depth and use the Annotated Bibliography and Bibliography to further your knowledge on these topics. In preparation for the Conference, each delegation will submit a Position Paper by 11:59 p.m. (Eastern) on 1 March 2022 in accordance with the guidelines in the Position Paper Guide and the NMUN•NY Position Papers website.

Two resources, available to download from the NMUN website, serve as essential instruments in preparing for the Conference and as a reference during committee sessions:

1. NMUN Delegate Preparation Guide - explains each step in the delegate process, from pre-Conference research to the committee debate and resolution drafting processes. Please take note of the information on plagiarism, and the prohibition on pre-written working papers and resolutions. Delegates should not start discussion on the topics with other members of their committee until the first committee session.
2. NMUN Rules of Procedure - include the long and short form of the rules, as well as an explanatory narrative and example script of the flow of procedure.

In addition, please review the mandatory NMUN Conduct Expectations on the NMUN website. They include the Conference dress code and other expectations of all attendees. We want to emphasize that any instances of sexual harassment or discrimination based on race, gender, sexual orientation, national origin, religion, age, or disability will not be tolerated. If you have any questions concerning your preparation for the committee or the Conference itself, please contact the Under-Secretaries-General for the Economic and Social Council (ECOSOC) Department, Lauren Kiser (Conference A) and Eileen Austin (Conference B), at usg.ecosoc@nmun.org

We wish you all the best in your preparations and look forward to seeing you at the Conference!

Sincerely,

Alliyah L. Edwards, Director
Matthias Burtscheidt, Assistant Director

Allison C. Uhrick, Director
Filippo Maria Margheritini, Assistant Director

NMUN is a Non-Governmental Organization associated with the United Nations Department of Global Communications and a 501(c)(3) nonprofit organization of the United States.

United Nations System at NMUN•NY

This diagram illustrates the UN system simulated at NMUN•NY and demonstrates the reportage and relationships between entities. Examine the diagram alongside the Committee Overview to gain a clear picture of the committee’s position, purpose, and powers within the UN system.
Committee Overview

Introduction

Chapter X of the *Charter of the United Nations* (1945) established the Economic and Social Council (ECOSOC) as a founding body and one of the six principal organs of the United Nations (UN). The ECOSOC oversees the allocation of approximately 70% of UN resources through its oversight of 12 specialized agencies, and 13 functional and regional commissions. The Council is mandated to serve as the primary body for policy dialogue on economic, social, cultural, educational, and health-related topics, to advise and coordinate the activities of Member States and other UN entities on matters within this mandate, and to lead discussion on the implementation of the international development framework.

ECOSOC has undergone several reforms since its inception; notably, during 1960s and 1970s, developing Member States worked to broaden the agenda of the UN and bring focus to new areas, including the promotion of development and the elimination of poverty. In 1971, General Assembly adopted resolution 2847(XXVI), which amended Article 61 of the *Charter of the United Nations* by increasing ECOSOC membership from 27 to 54, in order to better reflect global economic and geographic diversity. In 1977, the General Assembly adopted resolution 32/197, *Restructuring of economic and social sectors of the United Nations System*, and sought to improve ECOSOC’s effectiveness by increasing coordination with its subsidiary bodies. To avoid any duplication of work due to broad mandates, the General Assembly adopted resolution 50/227 (1995) on *Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields*, clarifying that its role is to provide policy guidance while ECOSOC’s focus is on coordination of implementation.

Throughout the last decade, the General Assembly implemented additional reforms aimed at strengthening the working methods of ECOSOC. These reforms included an expansion of ECOSOC’s functions to enable it to lead on identifying and discussing emerging challenges, to act as a policy forum for global leaders through the High-Level Political Forum on Sustainable Development (HLPF), and provide a platform of accountability for all levels of monitoring and reporting on universal commitments. An example of this is ECOSOC’s commitment to engaging youth in a partnership focused on ensuring the successful attainment of the 2030 Agenda for Sustainable Development (2015) and its Sustainable Development Goals (SDGs). This partnership began when the 2010-2011 Year of Youth prompted the first ECOSOC sanctioned Youth Forum in 2012, a meeting that engaged youth and brought to light issues like unemployment for the younger generation. The success of the first sanctioned ECOSOC Youth Forum has now resulted in a more structured and thorough annual forum. In 2018, the General Assembly adopted resolution 72/305, reiterating that ECOSOC’s work should be rooted in inclusivity,

12. Ibid.
transparency, and flexibility. The 2020 Youth Forum was slated to take place in mid-April 2020, but has since been postponed due to the COVID-19 pandemic, with a new date to be announced at a later time.

**Governance, Structure, and Membership**

ECOSOC is comprised of 54 Member States, each of which is elected by the General Assembly for overlapping three-year terms. The members are elected according to the geographical distribution of UN Member States that are meant to ensure representation from all regions and levels of development. Seats are allocated to each of the following five regional groups of states: 14 to Africa, 11 to Asia and the Pacific; six to Eastern European; 10 to Latin American and Caribbean; and 13 to Western European and Others Group. ECOSOC proceedings are overseen by a President, Vice-President, and Rapporteur, in tandem with a Bureau consisting of the President and four Vice-Presidents. These representatives are each elected for a one-year term at the end of each annual session in July. The Bureau is elected by the full Council annually in July. The Bureau sets ECOSOC’s agenda, devises action plans, and collaborates with the Secretariat on administrative duties. ECOSOC’s presidency rotates among the regional groups. The current president is Ambassador Collen Vixen Kelapile of Botswana, who was elected for the 2022 session.

Each year, ECOSOC meets for one organizational session, which typically takes place anytime between February and July, and one substantive session, which usually occurs in mid-July. Organizational sessions are dedicated to administrative aspects, such as agenda setting and elections to the Bureau. During substantive sessions, meetings are divided into five segments: the High-Level Segment, the Coordination Segment, the Operational Activities Segment, the Humanitarian Affairs Segment, and the Integration Segment, with each focusing on separate thematic aspects of the Council’s work. The addition of these five segments were mandated by General Assembly resolution 68/1 (2013), Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council. Each annual segment allows the plenary body to focus on specific agenda items and dedicate a specific number of working days to each segment. The High-Level Segment and HLPF, established by General Assembly resolution 67/290 and jointly guided by ECOSOC and the General Assembly, focus on the implementation progress of the SDGs. The Coordination Segment meets

27 Ibid., p. 4.
annually upon the discretion of the Council and focuses on carrying out the recommendations brought forth by the High-level Segment.\textsuperscript{30} The Operational Activities Segment meets annually after the “first regular sessions of the executive boards of the funds and programmes of the United Nations system,” and focuses on providing guidance to ECOSOC on the implementation and strategies established by the General Assembly.\textsuperscript{31} The Humanitarian Affairs Segment is held in June and focuses on strengthening assistance from Member States on humanitarian emergencies with the additional goal of transitioning relief efforts towards development efforts.\textsuperscript{32} Lastly, the Integration Segment focuses on consolidating “all the inputs of Member States, the subsidiary bodies of the Council, the United Nations system and other relevant stakeholders and to promote the balanced integration of the three dimensions of sustainable development.”\textsuperscript{33}

ECOSOC oversees 14 subsidiary bodies and forums that hold their own sessions and provide recommendations, draft resolutions, and annual reports to the Council and, in some cases, to other bodies.\textsuperscript{34} The two most common types of subsidiary bodies are functional, which focus on specific issues, such as the Commission on the Status of Women (CSW), and regional commissions that focus on geopolitical topics, such as the UN Economic and Social Commission for Western Asia (ESCWA).\textsuperscript{35} Other subsidiary bodies include standing, ad hoc, expert, and other related bodies.\textsuperscript{36} Examples of subsidiary bodies include: the Committee on Non-Governmental Organizations, which serves as a standing committee; the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS, which serves as an ad hoc body; and the Permanent Forum on Indigenous Issues, which serves as an expert body.\textsuperscript{37} Each subsidiary body has adopted specific methods of work to align with its mandate, and methods are updated regularly.\textsuperscript{38}

**Mandate, Functions, and Powers**

Article 62(1) of the *Charter of the United Nations* (1945) mandates that ECOSOC “may make or initiate studies and reports with respect to international economic, social, cultural, educational, health, and related matters,” including human rights and freedoms, to present to the General Assembly and to UN specialized agencies.\textsuperscript{39} ECOSOC may also provide information and assist the Security Council when addressing humanitarian crises, including public health emergencies.\textsuperscript{40} For instance, ECOSOC has continually addressed COVID-19 and held an informal briefing on “Joining Forces: Effective Policy Solutions for Covid-19 Response” on 11 May 2020.\textsuperscript{41} As emphasized by recent reforms accentuating this role, ECOSOC also provides coordination, monitoring, and advice to UN programs, agencies, and funds on international development policies and their implementation.\textsuperscript{42} To further allow for coordination, a 2007 reform of ECOSOC brought forth by General Assembly resolution 61/16, established the High-level

Segment, an annual meeting that brings together representatives from governments, the private sector, academia, and civil society to discuss development cooperation.  

In addition to overseeing its subsidiary bodies, ECOSOC’s mechanisms allow for non-governmental organizations (NGOs) to consult on the work of the UN. There are more than 5,000 NGOs that have been granted ECOSOC consultative status, allowing them to attend and participate in various UN meetings, conferences, and special sessions and participate in international discussions. By obtaining consultative status, these NGOs are allowed to provide insight to different UN bodies, discussion, and policies as they pertain to specialized topics and regions. Applications for consultative status are considered by ECOSOC’s Committee on NGOs, which was established in 1946 and is made up of 19 Member States. The Committee on NGOs directly reports to ECOSOC on the procedural and substantive matters raised by NGOs. ECOSOC resolution 1996/31 (1996) defines the principles, eligibility requirements, rules, procedures, obligations, and responsibilities for NGOs and the UN in establishing the consultative relationship. While the Committee on NGOs has postponed its meetings due to COVID-19, at its 1 September 2018 session, the Committee granted consultative status to 219 NGOs, deferred an additional 198 NGOs for consideration in 2020, and reviewed quadrennial reports of suspended NGOs, which resulted in the reinstatement of 37 organizations and the removal of 115 organizations.

Recent Sessions and Current Priorities

Beginning ECOSOC’s annual session, the Operational Activities Segment met from 19-22 and on 27 May 2020 to review the implementation of General Assembly resolution 71/243 (2017), the Quadrennial comprehensive policy review of operational activities for development of the United Nations system, and resolution 72/279 (2018) on Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system. The Quadrennial Comprehensive Policy Review of UN system operational activities (QCPR) is a tool for Member States to provide policy recommendations to the UN development system and the 2020 QCPR was generally regarded as successful by participants. In the context of the QCPR, the Secretary-General called for shifting focus to “how the UN development system can ensure accelerated efforts as we embark on the Decade of Action for the SDGs.” The inputs generated by the Operational Activities Segment will be given to the General Assembly during its General Debate in fall 2020.

From 9-11 June 2020, ECOSOC’s Humanitarian Affairs Segment met virtually under the theme “Reinforcing humanitarian assistance in the context of the seventy-fifth anniversary of the United Nations: taking action for people-centered solutions, strengthening effectiveness, respecting international humanitarian law and promoting the humanitarian principles.” The high-level panel discussions and

events focused on areas affected by the pandemic, such as the treatment of internally displaced persons (IDPs), innovation and new technology, and sexual and gender-based violence.\textsuperscript{56} Additionally, a joint event by the Humanitarian Affairs Segment and the Operational Activities Segment addressed peacebuilding in humanitarian crises by looking at the Central Sahel to identify opportunities of further collaboration.\textsuperscript{57}

In preparation of the 2020 HLPF, the Secretary-General published his report on “Accelerated action and transformative pathways: realizing the decade of action and delivery for sustainable development,” highlighting COVID-19’s effects on the global economy and vulnerable populations.\textsuperscript{58} The report called for strengthened multilateralism in Member States’ COVID-19 pandemic response.\textsuperscript{59} The 2020 annual HLPF was held from 7-16 July 2020 under the theme “Accelerated action and transformative pathways: realizing the decade of action and delivery for sustainable development.”\textsuperscript{60} In light of the COVID-19 pandemic, sessions were held virtually, and participants addressed how to achieve the SDGs while tackling the pandemic.\textsuperscript{61} As part of the 2020 HLPF, 47 Member States presented their Voluntary National Reviews (VNRs), outlining their progress on the SDGs.\textsuperscript{62} The draft ministerial declaration of the HLPF highlighted participants’ commitment to the Sustainable Development Goals Summit’s Political Declaration, which was adopted in September 2019.\textsuperscript{63} The draft declaration further recognizes the need for an immediate and global ceasefire, improved resilience, universal access to social protection and health services, and strengthened cooperation.\textsuperscript{64} Additionally, former ECOSOC President Juul stated that the UN is committed to combatting the COVID-19 pandemic and “rebuilding better after the pandemic, with the 2030 Agenda for Sustainable Development as our roadmap.”\textsuperscript{65} The theme for HLPF 2021 will be determined in September 2020 by the General Assembly.\textsuperscript{66}

**Conclusion**

ECOSOC is responsible for coordinating activities and programs through the expansive UN system towards the ultimate goal of sustainable development.\textsuperscript{67} The Council has demonstrated a commitment to mobilizing resources and building efforts to address key priority issues, including the promotion of development and the formation and maintenance of international partnerships, such as partnerships with business entities for the purpose of funding development initiatives.\textsuperscript{68} As the Council’s current President, Collen Vixen Kelapile states, “ECOSOC must rise to the occasion” of helping global recovery from

COVID-19, and wage “a spirited war against disease, poverty and inequality, impacts of climate change.”69

**Annotated Bibliography.**

This report was published in accordance with the changes and reforms that were made to allow ECOSOC to better fulfil its mandate. The report outlines the key points made within General Assembly resolution 68/1 (2013) and the new set of priorities for ECOSOC in addressing global issues. Additionally, the chart included in the document highlights the yearly schedule of ECOSOC as well as its meeting structure. Delegates would find this useful in understanding ECOSOC's current mandate and structure that extends beyond Chapter X of the Charter of the United Nations.

This Report of the Secretary-General was published on 8 May 2020 in preparation for the 2020 HLPF. In response to the outbreak of COVID-19, the report notes key areas that can have a significant socioeconomic impact on people’s wellbeing. In line with the provisional agendas, the report also addresses areas such as energy and extreme poverty. Delegates would find this document useful in understanding the priorities of ECOSOC and the background of HLPF 2020.

While Chapter X of the Charter of the United Nations established the foundation of ECOSOC that is held to this day, its operational work and priorities have shifted along with the change in the UN’s priorities. General Assembly resolution 68/1 strengthened ECOSOC’s role within the UN system, and revised the segment system of ECOSOC, changing it to its current five segment approach, and establishing high-level and multi-stakeholder forums. It is highly recommended that delegates familiarize themselves with the content of this monumental resolution to understand the current foundation of ECOSOC.

1. Realizing Sustainable Economic Growth by Achieving SDG 8

Introduction

Sustainable economic growth is a rate of maintained growth that does not create significant economic burdens on future generations and can drive societal progress within society by creating decent jobs and improving living standards globally.70 Because of this, the importance of sustainable economic growth is recognized in the 2030 Agenda for Sustainable Development (2015) under Sustainable Development Goal (SDG) 8, ("decent work and economic growth").71 Specifically, goal target 8.1 directly addresses sustainable economic growth by aiming to sustainably increase the annual growth rate of Gross Domestic Product (GDP) per capita, with a focus on an annual GDP growth of 7% for least developed countries (LDCs).72 LDCs, according to the United Nations Department of Economic and Social Affairs (UN DESA), are in need of this support due to their lower-income status and increased vulnerability to environmental and economic shocks as a result of poor and unsustainable infrastructure.73 In the context of SDG 8, dialogue on sustainable economic growth includes areas such as: monitoring employment and unemployment rates with a focus on those not in education, employment, or training (NEET); measuring a country’s material footprint, known as its allocation of extracted raw materials (biomass, fossil fuels, and metal and non-metal ores) for economic demand; and labor rights, safe working conditions, and child labor and forced labor.74 Since its initial spread, the COVID-19 pandemic has thwarted economic growth, leading to a decrease in global employment and productivity.75 As a result of the pandemic, the international community saw a sharp decrease in global GDP and an increase in unemployment for women, which led to a larger population percentage of people falling under NEET.76

Within the aforementioned areas of focus within SDG 8, the first includes levels of employment and unemployment rates, focusing on those who are in the NEET category and on equal access to decent work.77 The second is a country’s material footprint, which is the allocation of used raw material extraction to the final demand of an economy.78 The total material footprint is considered as the “sum of the material footprint for biomass, fossil fuels, metal ores and non-metal ores.”79 The third concerns labor rights, safe working environments, and child labor and forced labor.80 Since its initial propagation, the COVID-19 pandemic has thwarted economic growth, leading to a plunge in global productivity and employment, which has led to a steep collapse of global GDP, in addition to greater unemployment for women, and leading to larger numbers of youth in NEET.81

International and regional organizations around the globe, including those within the United Nations (UN) system, such as UN DESA, the International Labor Organization (ILO), the United Nations Development Programme (UNDP), among others, have acted since the adoption of the 2030 Agenda to support Member States in advancing the SDGs.82 In particular, the Economic and Social Council (ECOSOC) has continuously monitored goal targets and facilitated dialogue among governmental and non-governmental bodies to achieve the goals outlined in the 2030 Agenda.83

International and Regional Framework

The right to work in decent and fair conditions are preserved in the *Universal Declaration of Human Rights* (UDHR), first published in 1948. In article 23, the UDHR highlights not only the right to work, but the right to human dignity in working conditions, equal pay for equal labor, and access to work. The *International Covenant on Economic, Social and Cultural Rights* (1966) provides further guidelines to promote fair labor rights as well as the right of assembly. Additionally, the *Charter of Economic Rights and Duties of States* (1974) provides further guidelines for Member States and the international community on sustainable economic growth. Chapter III states the necessity to safeguard the environment, calling for further cooperation among Member States in this sphere. Chapter III further endorses economic practices, which range from lower tariffs to a fair distribution of economic development. Similarly, the *Declaration on the Right to Development* (1986), affirming through article I, that development is an inalienable human right and emphasizes the importance of its achievement, while simultaneously upholding human rights and individual liberties. The *United Nations Guiding Principles on Business and Human Rights* (2011) also presents a set of guidelines for States and private businesses in order to promote labor rights and human rights. ILO’s *Declaration on Social Justice for a Fair Globalization* is another landmark document adopted by the organization in 2008, which underlines the need for social justice in the transformative age of globalization and highlights four foundational pillars: employment, social protection, social dialogue, and fundamental principles and rights at work.

The *United Nations Framework Convention on Climate Change* (1992), providing the frameworks for creating the Conference of the Parties (COP), highlighted the importance of preserving the natural environment and addresses increasing greenhouse gases emissions. Article IV calls for the inclusion of climate change in economic policies and greater cooperation in fields such as extraction of resource and research, among the others. Similarly, the *United Nations Millennium Declaration* (2000) provided the framework for the Millennium Development Goals (MDGs) and later, inspiration for the SDGs. The MDGs highlight the need for international cooperation to achieve economic growth, and sustainability, in order to limit anthropogenic disasters and preserve the environment in Chapter IV. Lastly, the *Addis Ababa Action Agenda* (2015) provides a framework to for financing sustainable development through three dimensions: inclusive economic growth, protecting the environment, and promoting social inclusion.

The landmark resolution for sustainable development remains General Assembly resolution 70/1, *Transforming our world: the 2030 Agenda for Sustainable Development*, adopted in 2015 which outlines the *2030 Agenda for Sustainable Development* (2015). The 2030 Agenda, which comprises 17 goals and 169 related targets seeks to bring peace and prosperity, advance human rights, and protect the environment through international cooperation and development. In particular, SDG 8 seeks to promote

98 Ibid.
productivity, entrepreneurialism and innovation while implanting equal access to labor with fair and decent working conditions.\textsuperscript{100}

\textbf{Role of the International System}

ECOSOC monitors and assesses progress achieved in sustainable development as well as provides a platform for Member States, governmental, and non-governmental actors to discuss and cooperate on the aforementioned fields.\textsuperscript{101} The ECOSOC Youth Forum provides an annual platform for young persons to engage with governmental institutions on matters of sustainable development.\textsuperscript{102} In particular, the 2021 ECOSOC Youth Forum emphasized the importance of closing gaps between education and professionalism, as well as providing decent working conditions for entry-level internships and traineeships.\textsuperscript{103}

The High-Level Political Forum (HLPF) and the Development Cooperation Forum (DCF), overseen by ECOSOC, facilitate dialogue among governmental and non-governmental bodies, while also providing recommendations to enhance cooperation for the 2030 Agenda.\textsuperscript{104} The Forum on Financing for Development Follow-Up (FFD), mandated by the Addis Ababa Action Agenda, aims to assess current development finances and relative allocations, while also establishing dialogue with the World Bank, the International Finance Corporation (IFC), the International Monetary Fund (IMF), and the World Trade Organization (WTO).\textsuperscript{105} The Operational Activities for Development Segment (OADS), as outlined in General Assembly resolution 72/305, \textit{Review of the implementation of General Assembly resolution 68/1 on the strengthening of the Economic and Social Council}, seeks to guarantee accountability and optimize activities in relation to the 2030 Agenda.\textsuperscript{106}

The 2016 General Assembly resolution 70/299, \textit{Follow-up and review of the 2030 Agenda for Sustainable Development at the global level} led to the strengthening and enhancement of ECOSOC and its subsidiaries bodies in accordance to the 2030 Agenda.\textsuperscript{107} General Assembly resolution 72/279, \textit{Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system}, calls for an enhancement to the operations of the UN system’s local ramifications, such as country offices, while also improving the streamlining process from the international, regional and local levels, allowing for increased cooperation among these actors.\textsuperscript{108}

In addition to ECOSOC, actors throughout the UN system, as well as the private sector, play a central role in achieving sustainable economic growth.\textsuperscript{109} Among these, the project Fashion Makes Change by the Rockefeller Philanthropy Advisors, unites actors across the fashion market and civil society under the goal of empowering women and taking action against climate change in the apparel industry.\textsuperscript{110} The project directly funds the “Empower@Work Collaborative” (E@W), a joint effort of foundations, nonprofits

\item UN SDGs Partnerships Platform, \textit{Fashion Makes Change}.
\end{enumerate}
and the ILO-IFC Better Work project. Through their initiative, E@W directly supports women in the fashion industry, especially within the garment and footwear industry, while additionally seeking to advance gender balancing throughout the supply chain. According to Fashion Makes Change, its programs have reached more than five million workers with skills, knowledge, and confidence for more than a decade. Moreover, the UN Global Compact (UNGC), adopted in 2005 by former Secretary-General Kofi Annan, encourages partnerships between UN institutions and businesses by providing good governance practices and recommendations for all adhering businesses following the UNGC’s ten principles, which focus on areas of human and labor rights, as well as environmental sustainability. Another platform developed by the UNGC, the SDG Compass, aims to advance SDGs within companies, by providing specific tools and indicators developed by academia, civil society, private and public sector, while also monitoring their efforts and developing feedback. 

Among UN bodies, UN DESA, the United Nations Conference on Trade and Development (UNCTAD) and the United Nations Development Programme (UNDP) share responsibilities in monitoring, analyzing and implementing sustainable development measures and participate in several international meetings, including the DCF and the FFD Forum. Furthermore, ILO’s mission seeks to promote decent work, uphold labor standards while advancing social justice. The organization has been providing a platform for dialogue among its tripartite components, including workers, employers and governments, as well as relevant data and analysis on progress related to SDG 8. 

At the civil society level, the International Trade Union Confederation (ITUC) has been proactive in its efforts to achieve SDG 8 through its campaign “Time for 8.” The campaign’s goals include strengthening the role of trade unions in relation to national and international institutions, emphasizing the role of SDG 8 within the 2030 Agenda, and calling for a new social contract that addresses the needs of workers and society in a sustainable way. In implementing a new social contract between governments, workers and businesses, the “Time for 8” campaign advocates for upholding labor rights, decent minimum wages, establishing dialogue for ecological and technological transitions. In addition to advocating for due diligence and accountability as drivers for businesses’ operations, the ITUC has spearheaded efforts towards their initiative by training and mobilizing workers worldwide, advocating to and negotiating with governments and businesses, and raising awareness on labor rights and workers’ grievances through reports and events.

**Impacts of COVID-19 in Achieving SDG 8**

The COVID-19 pandemic halted, and reversed, years of economic progress in achieving SDG 8, as well as progress toward sustainable economic growth. According to ECOSOC’s statistics division, global GDP growth per capita declined by 4.6% in 2020, and is predicted to increase by 4.3% in 2021. While economic growth was in decline prior to the pandemic, as demonstrated by the decrease by 0.5% in

120 Ibid.  
122 Ibid.  
124 Ibid., p. 42.
global GDP, the pandemic hardened economic conditions, unemployment, income, and safety.\textsuperscript{125} According to the ILO, up to 400 million workers could have been unemployed by the second quarter of 2020.\textsuperscript{126} Additionally, 1.6 billion workers in the informal economy, which are workers operating outside formal arrangements such as law or practice, were affected by the pandemic, with income decreasing up to 81\%.\textsuperscript{127} According to the ILO, informal economies comprise those economic activities that are not encompassed by formal arrangements.\textsuperscript{128}

The tourism industry faced particular hardships caused by the COVID-19 pandemic.\textsuperscript{129} As reported by UNDESA in \textit{The Sustainable Development Goals Report 2021} (2021), the tough losses in this sector make this field one of the most hard hit by the effects of the pandemic.\textsuperscript{130} According to the \textit{Sustainable Development Goals Report 2020} (2020), tourism became a more relevant component of a country’s GDP between 2008 and 2018.\textsuperscript{131} The report encourages restarting economic growth in a post-pandemic world by financially recovering tourism, not only for the sector itself, but also for businesses which benefit from the industry.\textsuperscript{132} UNDP has worked to revive former and ongoing projects focused on sustainable tourism and revitalize these projects through marketing aimed at domestic tourists.\textsuperscript{133} For example, the Via Dinarica hiking trail in Bosnia and Herzegovina has become an emerging area of sustainable tourism through its empowerment and investments of local communities, while also providing accessibility and networking opportunities.\textsuperscript{134}

The COVID-19 pandemic has negatively impacted informal economies around the world.\textsuperscript{135} The ILO in 2018 estimated more than 60\% of the world’s employed population are in the informal economies.\textsuperscript{136} However, 93\% of the world’s informal employment is present in emerging and developing countries, in particular: Africa (85.8\%); the Middle East (68.6\%); Asia and the Pacific (68.2\%); the Americas (40\%); and Europe and Central Asia (25.1\%).\textsuperscript{137} As early as April 2020, the ILO published generic guidelines from \textit{Rapid assessment of the impact of COVID-19 on enterprises and workers in the informal economy in developing and emerging countries} (2020), emphasizing the role and size of informal economies and the economic and health challenges created by the pandemic.\textsuperscript{138} In the report, the ILO states that the heaviest impacted sectors, wholesale and trade retail, account for about 25\% of the informal non-agricultural economies in the world, and one third in the developing world.\textsuperscript{139} The informal economy not only plays an important role in the global economy, it also plays an important role in the thematic areas of SDG 8.\textsuperscript{140} Informal economies focus on target 8.3, which seeks to formalize small and medium enterprises with the ultimate goal of providing financial benefits and fair labor standards.\textsuperscript{141}

The ILO provides specific guidelines on how to tackle the impact of COVID-19 on the economy.\textsuperscript{142} These guidelines are based on four pillars: stimulating the economy and employment; supporting enterprises,
jobs and incomes; protecting workers in the workplace; and relying on social dialogue for solutions. More specifically, the ILO recommends the adoption of fiscal policies such as equity injections, loan guarantees and tax exemptions, which would allow for fiscal relief for both employers and employees. Another priority is the protection of workers, not only through healthcare assistance, unemployment, and sickness benefits, but by adapting measures in the workplace without jeopardizing workers’ health. In this regard, Thailand and South Africa have, respectively, increased financial protection for nationals and non-nationals who seek emergency healthcare and extended unemployment insurance for domestic workers. Furthermore, the ILO published *COVID-19 crisis and the informal economy* (2020), which produced policy guidelines through a multi-sectorial approach. The recommendations include supporting greater access to affordable healthcare and limiting the spread of the virus through adequate communication and coordination programs to raise awareness on COVID-19 and safeguarding workers in the workplace.

In May 2020, ECOSOC addressed the socio-economic spillovers caused by the pandemic by encouraging stimulus packages to keep businesses open, including businesses in informal economies and businesses for labor and human rights. In July 2021, the HLPF focused on the issue of eye health and hosted a side event addressing the connection between eye vision, SDG 8 and COVID-19. The event highlighted that vision loss costs an estimate of $411 billion and encouraged greater access to eye healthcare to boost economic growth. In May 2021, HLPF highlighted economic recovery through the Business and Industry Major Group, which is pivotal for the achievement of SDG 8, which stressed the importance of partnerships and cooperation among businesses, while maintaining a high quality standard for business meetings and improving frameworks in coordination with UN bodies. In the same month, ECOSOC highlighted the opportunity and necessity for a sustainable economic recovery from the pandemic, as well as preventing economic downfall, in the report *Sustainable and resilient recovery from the coronavirus disease pandemic that promotes the economic, social and environmental dimensions of sustainable development*.

**Gender Inclusiveness in Sustainable Economic Growth**

The lack of gender inclusivity in the economy has been an ongoing issue prior to the COVID-19 pandemic as demonstrated by SDG 8.5, which emphasizes non-discrimination and women in the workforce. As reported by the IMF in its policy paper *Pursuing Women’s Economic Empowerment* (2018), gender inclusiveness leads to a number of benefits within a country’s economy, including increased growth, productivity, and economic resilience, as well as fostering equality in income distribution. In addition, the IMF draws attention to systemic normative and legislative inequalities, including gender pay gaps, which are still present worldwide. Similarly, the OECD stated that gender-based discrimination in social institutions hampers economic development as it reduces countries’ income.

156 Ibid., pp. 7-11.
In 2020, UN Women published the report *From Insight to Action: Gender Equality in the Wake of COVID-19*, exposing the pandemic’s effects on women in the workforce, where a woman’s employment is 19% more at risk compared to men.\(^{158}\) Furthermore, the report also highlights loss in income experienced by 60% of 740 million women, who are employed in informal economies, and a 72% job loss among domestic workers, 80% of whom are women.\(^{159}\) The UN Women report, as well as the IMF report, both include proposals increasing a woman’s accessibility for childcare, healthcare, and economic security.\(^{160}\)

In addition, the United Nations Industrial Development Organization (UNIDO) launched numerous projects to advance women-led investments through trainings, partnerships and financial facilitations.\(^{161}\) UNIDO further supports youth professional formation and women’s inclusiveness through the Learning and Knowledge Development Facility (LKDF), which fosters industrial skills development for young people in emerging economies and promotes sustainable and industrial development through projects such as the Académie de Conduite de Camions En Sécurité (ACCES) in Morocco.\(^{162}\) A collaboration between the Moroccan government, Volvo Group, the United States Agency for International Development (USAID), and UNIDO, ACCES provides Moroccan women with training programs to become well-trained and skilled truck and bus drivers, as well as Moroccan youth with an interest in road transport.\(^{163}\)

In addition, UN Women has been proactive in promoting women inclusivity in the economy through projects such as Women’s Empowerment Principles (WEPS), created alongside the UN Global Compact, with the goal of promoting gender equality and women inclusiveness within businesses.\(^{164}\) Other initiatives through UN Women include Markets for Change, which seeks to advance safety, equality, women empowerment, and inclusivity in marketplaces in the Pacific.\(^{165}\) In 2012, UN Women, in cooperation with other UN agencies, implemented the Joint Programme on Accelerating Progress Towards the Economic Empowerment of Rural Women, which enhanced women’s participation and empowerment in rural economies.\(^{166}\)

ECOSOC reiterated the importance of women’s empowerment and equal access to services and opportunities through its resolution 2016/3, *Multi-year programme of work of the Commission on the Status of Women*.\(^{167}\) Alongside its resolution 2021/52, *Mainstreaming a gender perspective into all policies and programmes in the United Nations system*, ECOSOC further highlighted gender inequality and provided recommendations for gender mainstreaming.\(^{168}\) Such policies focus on the gender inclusiveness in the post-pandemic recovery plans at an international and national levels, but also enhancing capacity-building aiming to advance gender equality.\(^{169}\)

**Conclusion**

The pathway to achieving SDG 8 presents different, multi-faceted obstacles which encompass social and environmental themes, from the increasing number of youth in NEET to labor rights and material footprints.\(^ {170}\) Furthermore, challenges faced by women in the workplace are hindering sustainable

economic growth and reducing development.\textsuperscript{171} The COVID-19 pandemic has thwarted economic growth and accentuated pre-existing inequalities, consequently halting progress towards the goals of the 2030 Agenda.\textsuperscript{172} As UN Secretary-General António Guterres stated in his remarks at the ECOSOC segment for the OAS: “the COVID-19 crisis has shone a spotlight on international cooperation.”\textsuperscript{173} The pandemic has further exposed existing challenges, such as lack gender inclusiveness, which have limited progress towards SDG 8.\textsuperscript{174} Through round-table diplomacy and robust joint efforts, Member States and stakeholders must not only recover from the global pandemic, but are encouraged to start recovery with the goal of advancing equality, social justice, and sustainable economic growth, aiming to achieve the target goals of SDG 8 by 2030.\textsuperscript{175}

Further Research

When researching this important topic, delegates should consider how ECOSOC’s role and capacity can achieve sustainable economic growth, and additional questions such as: How are the different socio-economic scenarios around the world affect the implementation of policies aimed at advancing SDG 8? How can countries involve different stakeholders to advance sustainable economic growth and achieve SDG 8? What UN agencies and organs can provide the right platform to address the aforementioned issues? How can countries tackle COVID-19 while remaining on track to achieve SDG 8? What policies should be prioritized in furthering sustainable economic growth?

Annotated Bibliography

The annual report presented by the Secretariat assesses the progress made worldwide in reaching the SDGs. Given the recent outbreak of COVID-19, the report did not focus extensively on the effects of the pandemic, but consistently reiterated information and analysis related to the SDGs. The section on SDG 8 briefly provides figures and information regarding economic growth as well as highlighting instances of lack of decent work conditions.

The summary on the 2021 ECOSOC Youth Forum provides an overview for the event held under the auspices of ECOSOC. The event summary is important for better understanding the type of events ECOSOC organizes, providing further understanding the body’s mechanism and dynamics. Additionally, the summary highlights the vision of youth on the SDGs, as the participants emphasized numerous issues relevant for the new generations.

\textsuperscript{173} UN Secretary-General, \textit{UN Secretary-General's remarks to ECOSOC Segment on Operational Activities for Development on 18 May 2021, in New York}, 2021.

This report highlights the hardships and outfalls caused by the COVID-19 pandemic on women. The report analyses various themes, focusing on socio-economic issues that span from domestic violence to healthcare. The report is particularly relevant for delegates due important information on women in the workforce and how the pandemic has affected the category.

This resolution is a landmark document that strengthened and further defined ECOSOC’s role in response to the 2030 Agenda. The resolution contains a practical understanding on the role required by this body as well providing guidance on its subsidiary fora. Delegates will find this document helpful in planning policy proposals that are applicable and congruent with ECOSOC and its mission.

This report provides an assessment of the COVID-19 pandemic on informal economies and includes valuable insight on the state of formal economies in both developed and developing countries. The report is important for delegates to gain a comprehensive understanding of the progress made on SDG 8 and sustainable economic growth.

Bibliography

2. Strengthening Partnerships for Sustainable Development in Least Developed Countries

“The LDCs are poised to be the next wave of development achievement. Investing in LDCs is not charity. It is an opportunity -- for all.”

Introduction

Approximately one billion people, around 14% of the world population, live in least developed countries (LDCs), of which half are living in extreme poverty. Simultaneously, the population is increasing with LDCs having the fastest population growth rate in the world with population numbers estimated to double by 2050. In the United Nations (UN) system, LDCs are defined as “countries that have low levels of income and face severe structural impediments to sustainable development.” Further, they are characterized by vulnerabilities to external economic pressures and an unstable socio-economic situation. The LDC category was first introduced in 1971 by General Assembly resolution 2768 (XXVI), Identification of the least developed among the developing countries, which acknowledged the special needs of this specific group. As of 2021, the LDC group is comprised of 46 UN Member States. Regionally, over two thirds of the countries are located in Sub-Saharan Africa. The remaining LDCs include 12 states located in Asia and the Pacific, as well as Haiti being the only LDC in Latin America and the Caribbean.

LDCs are categorized by the UN Committee for Development Policy (CDP), a subsidiary body of the Economic and Social Council (ECOSOC). CDP reviews the status of the LDCs based on socio-economic situations and development of the states, using three criteria: income, human assets, and economic and environmental vulnerability. In regard to the income criteria, countries with a three-year average of gross national income (GNI) per capita lower than $1,018 are included on the list. The Human Assets Index (HAI) indicates the education and health of a society and comprises six indicators including child mortality, literacy, or gender parity in school enrollment. The Economic and Environmental Vulnerability Index (EVI) consists of eight indicators, which are divided into an economic and an environmental subindex, with four indicators each. If countries are unable to reach specific combined thresholds in the three criteria, they will be included in the LDC category.

The Sustainable Development Goals (SDGs) provide policy guidance and set targets for LDCs in order to support socio-economic development and eventually graduate from the LDC category. The SDGs also

189 Ibid.
help LDCs in overcoming their structural economic problems, while building efficient economies and production capacities. As the SDG’s contribute to improving populations and strengthening partnerships, Goal 17 (“strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development”) is impactful to ECOSOC and its subsidiary bodies.

International partnerships are crucial for achieving sustainable development worldwide. Therefore, the UN (especially ECOSOC) fosters global partnerships and cooperation between states, international organizations, NGOs, and donors from the private sector. These partnerships occur on all levels (local, national, regional, and global), which is a key factor for development. Development assistance is important for a large number of developing states from the global south to foster their economies and encourage trade and growth in those countries. In 2019, $147.4 billion were spent on international development assistance, however in 2020 those numbers declined by 40% due to the COVID-19 pandemic. Consequently, international cooperation is more important than ever for developing countries to recover from the impacts of the pandemic and for the development of LDCs.

International and Regional Framework

In 2001 the General Assembly adopted resolution 56/227, Third United Nations Conference on the Least Developed Countries, establishing the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States (UN-OHRLLS) as recommended by the conference. UN-OHRLLS is the main body to coordinate partnerships and support for LDCs within the UN system, while monitoring the implementation of policy programs for sustainable development in the states.

In 2015, the General Assembly adopted resolution 70/1, Transforming our world: the 2030 Agenda for Sustainable Development, which introduced the Sustainable Development Goals (SDGs). While all 17 SDGs are important for achieving sustainable development, SDG 17 (“partnership for the goals”) is a core goal for the development of LDCs. The SDGs directly and indirectly contribute to improving the socio-economic situation within LDCs, including SDGs 1, 2, 7, 8, 9, 10, 13, and 17, all of which are included in LDC national development strategies.

The Programme of Action for the Least Developed Countries for the Decade 2011-2020 (2010), commonly known as the Istanbul Programme of Action (IPoA), has provided support and partnerships for sustainable development in LDCs in the past decade. IPoA provides a framework for LDCs and their development partners to take actions towards strengthening the economic, social, and environmental situation within LDCs. Additionally, IPoA sets a number of principles for its implementation, such as country ownership, an integrated approach, and genuine solidarity in partnerships, as well as the target of

194 UN Goal 17: Revitalize the global partnership for sustainable development.

198 Ibid.
199 Ibid.
200 UN-OHRLLS, Our Mandate.
201 Ibid.
202 UN General Assembly, Transforming our world: the 2030 Agenda for Sustainable Development (A/RES/70/1), 2015.
203 UNCTAD, Achieving the Sustainable Development Goals in the Least Developed Countries – A Compendium of Policy Options, 2018, p. 5.
204 Ibid., pp. 7-11.
206 Ibid., p. 8.
sustained economic growth for each LDC of 7% per year. Further, the IPoA includes a set of principles for the development of LDCs, as well as eight specific priority areas on which LDCs and their development partners should focus on in their policies, such as productive capacity, human and social development, and good governance at all levels.

**Role of the International System**

Every three years CDP assesses the list of LDCs and makes recommendations for graduation or for new countries to include on the list based on their criteria. ECOSOC then reviews and endorses the recommendations by CDP and presents their recommendation to the General Assembly who makes the final decision on a Member States’ graduation from, or inclusion to, the LDC category. To graduate, a country has to meet special graduation thresholds in the two out of the three criteria (GNI, HAI, EVI), in two consecutive triennial reviews. As an alternative, an income-only graduation is also possible, so long as the GNI of a country reaches at least double of the graduation threshold for income criteria in two consecutive reviews.

Alongside ECOSOC and CDP, UN-OHRLLS is responsible for the mobilization and coordination within the UN system, as well as providing international support to LDCs. UN-OHRLLS is key to the implementation of programmes of action for LDCs through monitoring achievements in countries, as well as at regional and global levels, and is reporting the development processes to ECOSOC and the General Assembly through annual reviews. Furthermore, NGOs and civil society organizations (CSOs) play a crucial role in supporting the development of LDCs, where they also play an active role in empowering marginalized populations in those regions. For example, these organizations create awareness-raising campaigns and movements for topics such as social justice, gender equality, or climate justice. Through the UN Non-Governmental Liaison Service, NGOs can actively collaborate in partnership with different UN agencies such as UN-OHRLLS, which assists in providing more legitimacy and democratic processes.

The 5th United Nations Conference on the Least Developed Countries (LDC5) was set to take place in March 2021 with the goal of negotiating an updated IPoA, as its current term expired in 2020. Due to the COVID-19 pandemic, however, preparations for the conference were postponed and the conference is now scheduled to take place from 23 to 27 January 2022 in Doha, Qatar. LDC5 is organized by UN-OHRLLS and will take place with Heads of States and Governments. As an outcome of the LDC5 conference, participants are expected to adopt a new Programme of Action for the next decade.

Countries in the LDC category are granted special international support measures in three categories: trade-related measures, development cooperation, and participation in the UN system. Those measures are based on international agreements and attempt to provide development assistance for LDCs. For example, LDCs receive preferential access to markets and goods, as well as special preferential treatments by the World Trade Organization (WTO). LDCs receive additional support for participation in the UN system and other international organizations through travel support and diplomatic trainings.

**Partnerships for Public Health in Least Developed Countries**

Although the on-going COVID-19 pandemic is a global issue, LDCs are hit particularly hard due to the pandemic's aggravation to pre-existing inequalities. The consequences of the pandemic are directly affecting the achievement of various SDGs, such as SDG 3 ("good health and well-being"), but also goals 1, 2, 4, 8, and 16. Prior to the pandemic, LDCs have faced enormous issues regarding their public health systems. According to data from the World Health Organization (WHO), in 2017 the life expectancy in LDCs was an average of 62.2 years, compared to the global average of 71.4 years. However, the life expectancy in LDCs gradually increased by almost ten years since 2000. Further, 47% of deaths in LDCs are estimated to be caused by maternal, perinatal, communicable, and nutritional conditions, while the global average is 22%.

WHO supports and assists LDCs in developing national health policies, strategies, and plans, which were adopted by only 31 LDCs by 2017. Further, 40% of WHO offices in LDCs played a major role as partners for creating national mechanisms to monitor health-related SDGs, as well as coordinating national responses to the COVID-19 pandemic. For partnerships, WHO provides access and laboratory support to address infectious diseases in LDCs. It will remain an important challenge for LDCs to improve and secure access to public health services for their populations. Because of this, international partnerships are important for strengthening public health in LDCs. Partnerships between professionals, agencies, communities and individuals is a fundamental condition for functioning public health systems.

Vaccination distribution is an important priority area of the UN in the fight against COVID-19. As of June 2021, only 3.1% of LDC populations received at least one vaccine dose and as of October 2021 that number has only grown to 3.5%. Only 1.2% of global vaccine doses have been distributed to LDCs,

---

223 Ibid, p. 27.
224 Ibid., pp. 28-33.
225 UN LDC Portal, *Support for the participation of LDCs in international organizations and processes.*
229 Ibid., pp. 2-3.
231 Ibid., 2017, p. 5.
232 Ibid., p. 7.
233 WHO, *Country presence in least developed countries (LDCs)*, 2021, pp. 15-16.
whereas 49.3% of the world population is fully or partially vaccinated.240 Through the COVAX vaccine sharing arrangement, a global collaboration agreement to ensure equitable access to vaccines, tests, and treatments to fight COVID-19 around the globe, LDCs are expected to receive two billion vaccine doses by the end of this year.241 Therefore, agreements such as COVAX are important partnerships for LDCs need in their recovery from the pandemic.242

In addition to the WHO, most LDCs have established partnerships with academic institutions, as well as international and local NGOs.243 Twelve of the LDCs are implementing the Global Action Plan for Healthy Lives and Well-Being for All (GAP) program.244 GAP is a program encompassing 13 multilateral agencies in the field of health and humanitarian development to support the achievement of health-related SDGs.245 WHO currently supports 192 South-South cooperation and triangular cooperation (SSTC) initiatives to improve public health in LDCs.246 Health systems in LDCs, however, are severely underfunded, a problem which is also highlighted by a lack of international support.247

**Strengthening South-South Cooperation and Triangular Cooperation**

While international donors and organizations from industrialized states play an important role in development partnerships for LDCs, another key factor includes partnerships among the developing countries of the global south, namely SSTC.248 While South-South cooperation describes the partnership between two or more developing countries, triangular cooperation indicates that this cooperation also involves certain industrialized countries or multilateral organizations (such as the UN) as support.249 The exchange of technology, knowledge, research, skills, and know-how among the global south countries is highly important for their development.250 ECOSOC encourages Member States for mutual learning and knowledge exchange to achieve the SDGs.251 In particular response to the COVID-19 pandemic, SSTC can be important in economic recovery for the global south, as it can help compensate the existential needs in those countries.252 Because of the insufficient support from the international community, coordination among the global south is essential for their future development.253

There are several examples of successful SSTC partnerships in LDCs.254 One such example includes the LDCs University Consortium on Climate Change, a program of ten universities in LDCs focusing on capacity-building through knowledge-sharing to address the challenge of climate change.255 Similarly, the Global South-South Development Center Project creates a network for knowledge and expertise sharing in the global south, including LDCs, and focusing on areas such as agriculture, environmental protection, and new energies.256 Such SSTC partnerships constitute best practices which can be utilized by other

244 WHO, *About the Global Action Plan for Healthy Lives and Well-being for All*.
245 WHO, *WHO country presence in least developed countries (LDCs)*, 2021, p. 30.
LDCs to support their own national developments.\(^{257}\) This is highlighted in a recent report by the United Nations Conference on Trade and Development (UNCTAD), titled *Building Solidarity Among Developing Countries*.\(^{258}\)

**Conclusion**

International partnerships are essential for sustainable development in LDCs to improve their socio-economic situations and future livelihoods.\(^{259}\) Especially in times of COVID-19, international cooperation is crucial for sustainable and resilient recovery from the pandemic.\(^{260}\) The international community has to act in solidarity, and SSTC should remain a crucial role in LDC partnerships.\(^{261}\) The upcoming months will reflect how situations in LDCs will develop and what the outcomes of the LDC5 conference in January 2022 will provide.\(^{262}\)

**Further Research**

Delegates researching this topic should consider the following: What partnerships are essential for the development in LDCs? How can those partnerships for LDCs be improved to work more efficiently? How can the UN system support the public health systems in LDCs? How can the role of SSTC be increased in the international system? How could the outcomes of the LDC5 conference allow for further partnerships in advancing sustainable development among LDCs?

**Annotated Bibliography**

This study published by the Committee for Development Policy shows the impacts of COVID-19 on the LDCs. It demonstrates the negative consequences of the pandemic on the sustainable development of the LDCs in areas like health, trade, or tourism and it also elaborates on the effect of the pandemic on LDC graduation. The study demonstrates that many LDCs responded quite effectively to the pandemic with their policies and preventive measures. It is therefore a great resource for delegates to research on the development in LDCs and the impacts and policies connected to COVID-19.

This report published by UNCTAD focuses on the implementation of the SDGs in LDCs. It suggests policy recommendations on how to implement SDG guidelines in order with the targets of the IPoA. It also contains a whole section about international support policies, which elaborates on the partnerships mentioned in this background guide and is a great resource for the topic of international partnerships for LDCs.

\(^{261}\) UN LDC Portal, *South-South cooperation and LDCs*.

\(^{262}\) UN, *LDC5 Conference*, 2021.
This handbook is the basic and comprehensive introduction to the topic of Least Developed Countries and should therefore be a starting point in every research. It contains all necessary information about the LDC category, criteria for their inclusion and graduation as well as the special support measures and development cooperation of the international community. The handbook gives a detailed overview about everything necessary to know about the socio-economic situation of the LDCs and is therefore an ideal comprehensive resource for delegates to start their research on this complex topic.

The Istanbul Programme of Action was the primary framework for support measures for LDCs in the past decade. This original text of the document includes the objectives, principles and priority areas of the programme. It is a good resource for delegates to understand why and how the support measures and development cooperation policies of the international community for LDCs were agreed on.

This third edition of the publication by UNOSSC elaborates on the practical implementation of SSTC in countries of the global south. It contains 195 examples of successful SSTC in developing countries, including various LDCs. In this report, delegates can get an impression of practical SSTC policies and their implementation which they can take as examples for their work at the conference.
